Acknowledgment

It is with a deep sense of gratitude and thankfulness I present this thesis which is the fruit of, and kind help and support of many without whose timely advise and transfer of valuable knowledge would not have been possible.

At the outset I would like to give my sincere thanks to my supervisor Dr. Amit Dhorde, whose consistent and continuous guidance has helped me to complete this work in a timely and structured manner. His valuable suggestions and advice has helped me to gain greater depth into the subject matter as well as channelized my thought processes to enable me to achieve my goal.

I would also like to thank Pune University and especially the Department of Geography and more specifically former head B. C. Vaidya and Prof. Vishwas S. Kale, Head of the Department of Geography, for giving me this opportunity to further my studies and carry out this important research that will take me a long way to better my life as well as achieve the next step in the field of my study.

I would like to express my deep felt gratitude to Prof. R. H. Krippan, Head of the Centre for Advanced Training, Indian Institute of Tropical Meteorology (IITM) and Ms. B. Preethi from IITM who were a great help in running the projection models and scenarios. This was a very important part of my thesis and their help formed the very basis of my analysis. I am deeply indebted to them for rendering me this valuable support.

Sincere thanks are also due to Prof. Arshad Sayyed, Head of the Department of Statistics, Poona College. This has been indeed a very important stage in my thesis and his kind support in conducting various statistical analyses has helped me to present greater insight in my thesis.

Further I would also like to thank Mr. Manish Paradkar for his computer assistance in writing the relevant program in Sequential Mann-Kendall test.

Dr. Nikhil Sherwalkar was most helpful in furthering my knowledge in GIS and remote sensing analysis, which was crucial to my research.

There are three important professors of whom I would like to make a special reference viz. Prof. Bohloul Ahjam, Dr. Alireza Shakiba, and Dr. Ebrahim Fattahi without whose help it would have become impossible for me to further my thesis. They were most encouraging and supportive and rendered me help from time to time.

I would like to put on record the valuable data given to me by various organizations
required for my research viz. Islamic Republic of Iran Meteorological Organization (IRIMO), Water Resource Management Organization of the Ministry of Energy, Islamic Republic of Iran, Iranian Department of Environment, National Iranian Cartographic Centre, Indian Institute of Tropical Meteorology and Program for Climate Model Diagnosis and Inter-comparison (PCM(DI), Lawrence Livermore National Laboratory, USA

Sincere thanks are also due to my esteemed friends especially Mr. Mahendra Korade, Mr. Mohammed Mohsen Nourafkhana, Mr. Vasef Omid and Ms. Azam Hayabadi. I would also like to make special mention of Dr. (Mrs.) Anargha Dhorde.

I am also thankful to my brother-in-law Mr. Fasih, my brother Mr. Ahmad Zarenstanak, my sisters, my aunt and my grandfather for their moral support.

I render my deepest thanks to my parents for their patience and giving me all the support for a successful and enriched life and valuable teachings. I would also like to give my thanks to my late sister Ms. Zarenstanak whom I miss very much and would have been a huge support to me had she been here now.

Special regards and thanks to the late Mr. Ali Asghar Mazeh for giving his life for Iran during the Iran and Iraq war.

Above all I render my heartfelt thankfulness and blessings received from God without whom nothing is possible. I bow to him in full gratitude.

Mr. Mohammad Zarenstanak
