

ACKNOWLEDGEMENTS

This thesis is the end of my journey in obtaining my Ph.D. I have not traveled in a vacuum in this journey. This thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people including my parents, well wishers, my friends and colleagues. At the end of my thesis I would like to thank all those people who made this thesis possible and an unforgettable experience for me and it is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study.

*This treatise, a humble expression of my life's ambition and a scientific dream come true, would have not materialized the way it is, without the benediction from almighty **GOD**. With limitless humility, I am Grateful to "GOD" the merciful, the compassionate, who bestowed me with health, tenacity and courage enough to go through this crucial juncture. I am grateful to "God", for bestowing me with affectionate parents, whose love, dedication & inspiration encouraged me to undergo higher studies.*

*With the overwhelming sense of legitimate pride and genuine obligation which gives me exuberant pleasure and privilege to express my eternal gratitude to my learned and revered guide **Dr. Ravinder Singh Chandel**, Associate professor (Entomology), CSK Himachal Pradesh Krishi Vishvavidyalaya, Palampur and Chair Person of my Advisory Committee. This work would not have been possible without his guidance, support and encouragement. Under his guidance I successfully overcame many difficulties and learned a lot. His unflinching courage and conviction will always inspire me, and I hope to continue to work with his noble thoughts. I can only say a proper thanks to him through my future work. It is to him that I dedicate this work, I am very much thankful to him for picking me up as a student at the critical stage of my Ph.D. Words fail me to express my appreciation to his support, generous care and the homely feeling during my stay at his residence in Thakurdwara. He was always beside me during the happy and hard moments to push me and motivate me. I can see the good shape of my thesis because of him and his suggestions in formatting the entire manuscript. A journey is easier when you travel together. Interdependence is certainly more valuable than independence.*

Mehta**, (Principal Scientist, Department of Entomology), for his valuable advice, constructive criticism and his extensive discussions around my work, I gratefully acknowledge **Dr. K. S. Verma** (Associate Professor, Department of Entomology), for his understanding, encouragement and personal attention which have provided good and smooth basis for my Ph.D. tenure.*

Kanwar** (Professor, Department of Microbiology), **Dr. D. K. Banyal** (Associate Professor, Department of Plant Pathology) and **Dr. Vidyasagar** (Professor, Department of Vegetable Science and Floriculture) for their valuable guidance, utilitarian exhortation and constructive suggestions.*

This thesis is the result of Sumit Vashisth who was always there when I really needed. Thank you doesn't seem sufficient but it is said with appreciation and respect to him for his support, encouragement, care, understanding and precious friendship. This helped me a lot to work for hours together tirelessly. I doubt that I will ever be able to convey my appreciation fully, but I owe him my eternal gratitude.

I expand my thanks to Mr. Sarvesh Chandel (Rusty) who shared his residence with me during my stay in Thakurdwara, and extended brotherly love towards me. It's my pleasure to acknowledge Mrs. & Mr. Col. R. C. Jaswal and Dr. Satish Chand Badhiwal for their constant moral support.

All the words in the lexicon will be futile and meaningless, if I fail to divulge my extreme sense of regards to **adorable parents** (Smt. Veena Devi and Sh. Sakreem Chand Pathania) for their sacrifice, prayers and blessings without which this work would have been a sweet dream. I owe everything to them. I am yet to find suitable words to express my heartiest affection for my Nana ji, Nani ji, brother (Sandeep Pathania) and my cousins (Rahul and Nisha) for their tender attachment and constant encouragement during the course of investigation. My motorbike 'Karizma' HP 37 C 1615 also deserves special thanks which carry me to various tough locations safely to conduct survey works of my study.

Most people are lucky to have one friend as constant and close to their heart as Arti is to mine. I am eternally grateful. Thank you Arti for being persistent and encouraging, for believing in me, and for the many precious memories along the way.

Moreover the services rendered by Mr. Kuldeep are acknowledged who provided me the best support and service during this period.
