Acknowledgement

On the successful completion of my thesis, I would like to acknowledge the people who helped and supported me directly or indirectly during the tenure of my PhD.

First and foremost, I would like to express my gratitude towards my supervisor Dr. Pawan Sharma who guided me to become a thinking researcher and also a nice human being. He has been very supportive and encouraging throughout and his wise teachings will always be with me to guide me in the toughest times. He, though gave me the freedom to think and design the experiments independently, was available to discuss and solve the problems which I faced during work. I feel privileged to work under his supervision. He has truly been a father figure for me.

I am deeply grateful to our Director Dr. V.S. Chauhan for allowing me to work in ICGEB and for providing excellent research facilities. I would also like to thank him for encouraging us to submit our PhD thesis in four years. I extend my sincere gratitude to my group leader Dr. Kanury Rao for being a source of inspiration, to think and do big.

I thank my DC members Dr. Anand Ranganathan and Dr. Raj Bhatnagar for their valuable inputs from time to time. I would again thank Dr. Anand Ranganathan and also his lab members for providing me with the human lung cell cDNA library and all the help pertaining to the bacterial-2-hybrid work.

I would also thank people of the Animal house, Dr. Chandramouli, Munna Ji, Patra, Sandeep, Ashok ji and Rakesh Ji for helping me in handling the animals.

I extend my thanks to my dear batchmates, Anamika, Shilpa, Deepti, Sonal, Jayashree, Vandana, Aravind, Ubaid, Mudassir, Samit, Enayat, Shashank and Marjan who were my
first friends in ICGEB. They have always been supportive and also good source of reagents.

I would like to thank my past and present labmates, Pavanish sir, Javed, Imran, Hardeep, Arun, Santosh, Suraj, Faisal, Varsha, Shashank sir, Ved Prakash, Neeta ma’am, Sobia, Deepti, Shingar, Shilpa Jamwal, Pandu, Manbeena, Siddharth, Aejaz sir, Varshney. I also thank Zaved bhai for helping me in tissue culture work.

I also wish to thank my close friends at ICGEB because of whom this place became a second home for me. ‘Pavanish sir’ has been a great friend and a great support during my PhD. I really owe him a lot for all his suggestions, scientific and otherwise. I had a gala time in ICGEB hostel with Shilpa Raghuvanshi, Anamika, Neha, Megha and Niyati. In the hostel and outside of it too, being with these people is like having an eternal party. I also thank Ganesh, Javed and Arun for being my friends and providing me with such an amicable environment. My trips to Manali, Rishikesh, Mussoorie, Kasauli, Jammu, and Sarchu with my ICGEB friends are the best parts of my memories of ICGEB.

I also thank all the people of RGP lab for accepting me as ‘pseudo-RGPian’ and inviting me in all their parties and get-togethers. I would like to give special thanks to Anamika, Megha, Poornima, Kuhulika, Niyati, Sachin, Upasana, Rajan, Chandra, Aravind, lav, Gokul and Meena for making me feel as a part of their own lab. Whenever I had any trouble or needed any reagent that was not available in my lab, RGP was the first place I turned to for help. This lab has been like my SOS in ICGEB. Oh, I almost forgot to mention that it was also my ‘adda’ during long incubation periods!

I extend my sincere thanks to my colleagues in Immunology, RGP, Virology and Malaria group for providing me reagents, instruments and their support without which this work would not been possible.
I also express my deep sense of gratitude towards my parents, sister, friends and my fiancé Akash for their unflinching care and encouragement. Because of their support, no responsibility or duty remained unfinished and I was able to devote my single-minded attention to my research work.

Last but not the least, the financial help from DBT and CSIR, Govt. of India is duly acknowledged.

Richa Agarwal
