ACKNOWLEDGEMENT

Finally, it is time to express my deep sense of gratitude to the people without whose unrelenting support and encouragement this work could never have been completed. No word is fit enough to describe my debt to Professor Uma Dasgupta, my supervisor who introduced me to the fascinating world of molecular biology and cancer genetics. This work would not have been possible without her invaluable guidance, constant encouragement and loving support.

I express the deepest respect to Professor Chanchal K. DasGupta, Dept. of Biophysics, Molecular Biology & Genetics, C.U. I will forever cherish his invaluable advises and help throughout the work. For me it was an honour to interact with a person like him.

I am indebted to Professor Utpal Chauhuri for his encouragement and suggestions regarding my work.

I wish to extend my respect and thanks to Prof. R.K. Poddar, Prof. B.B. Biswas, Prof. A.R. Thakur, Prof. A.S. Chakrabarti, Dr. S. RoyChoudhuri, Dr. S. Mukherjee, Dr. S. Ghosh, Dr. S. Kundu, Dr. A. Lahiri and Dr. S. SenGupta of Dept. of Biophysics, Molecular Biology & Genetics, C.U.

I gratefully acknowledge the contribution of all the teachers of the Dept. of Biochemistry, C.U. for their excellent teaching that provided me the adequate scientific background to carry on with the research problem I work upon. I express my gratitude to Dr. M. Dasgupta for recommending to this lab. I am indebted to Prof. D.J. Chattopadhyay, Dean of Science, C.U. for providing me with the automated sequencing facility. I am thankful to Dr. B. Ganguli, Dept. of Statistics, C.U. for helping me on statistical analysis.

I am grateful to Dr. A. Mukhapadhyay, Park Point Nursing Home; Dr. S. Chandra, Kothari Medical centre; Dr. U. Chaudhuri, Dr. P. Chakrabarti, Dr. S. Bhattacharyya and Dr. S. Roy, Institute of Haematology and Transfusion Medicine, Kolkata for providing me with the opportunity to get access to the patient samples and their clinical data. I express my indebtedness to all the patients and their relatives who are participated in this study.

I must thank my senior colleagues, Monojda, Debasishda, Soumenda, Sanjayda, Radhashridi, Aditidi, Shaondi, Sahelidi, Sharmiladi, Somadi, Suhitadi, Madumitadi, Sumanadi, Anjalidi, Sarmisthadi, Sanchitadi and Anjalidi.

I want to record my thanks and appreciation to my colleagues and juniors, Shubhrada, Yasminda, Subhneyda, Aninditadi, Tanidi, Sunipadi, Urmii-Ushri, Moumita, Gargi, Priyanka, Ananya, Subhendu(s), Ananyo, Aditi, Subhra, Driti, Umimala, Abhrayjoti (Dept. of Biotech, CU), Sanyo, Suman for their company.

Jayasridi, Sanmayda, Jaydipda, Arunimadi, Arpitadi, Aftabda, Anindita, Dibyendu and Debasis never hesitated to extend a helping hand to me during the entire course of my work. The office stuffs and technical stuffs of our department (Department of Biophysics, Molecular Biology & Genetics) have helped me in many ways. I would like to mention specially about Asokeda and Niladri, who always ready to provide their help.

I must acknowledge the hostel boarders and cooking stuffs, where I spend my last five and half years with their companionship.

Now it is time that I proclaim my indebtedness to my Baba, Maa and sister, who extended to me their unconditional mental and loving support.

I am thankfully remembered the innate atmosphere and adequate infrastructure that the University of Calcutta has provided me for research.

I am extremely grateful to Department of Science and Technology; and Indian Council of Medical Research for providing financial support during my research period.

Date: 22nd May 2007
