ACKNOWLEDGEMENTS

I would like to acknowledge and extend my heartfelt gratitude to my guide, Professor Samir Banerjee, for his valuable guidance, vital encouragement, patience and support throughout the study period.

I also gratefully acknowledge The Heads of Department of Zoology, University of Calcutta, for allowing me to use the laboratory facilities of the department. I am really indebted to Professor Padmanava Chakraborty, Department of Zoology and former Dean Science of Burdwan University and Dr. Debabrata Nag, Department of Biochemistry, Gurunanak Institute of Dental Science and Research for extending their laboratory facilities during different phases of the work.

My gratitude goes to Dr. Chinmay Sekhar Sarkar, Principal, Surendranath College, Kolkata, for allowing me to pursue the work along with my college duties. I am very thankful to Dr. S. D. Ghosh and Mr. A. Mondal owners of Jhagrashisha Bheri for giving me full freedom to work in their property. The farmers of Jhagrashisha must receive very special thanks for serving as a source of motivation and fostering my fishes.

I would like to express my appreciation to all my lab mates especially Dr. Suman Bhusan Chakraborty and Sandipan Gupta for extending their helping hand in crisis and Dr. Nilansu Das and Dr. Udita Ghosh Sarkar for their helpful guidance.

Finally, I would like to thank my parents, who always encouraged me to aim high in life and pursue higher education, and without whose sacrifice and struggle, I would have never reached where I am today. My brother, brother in law, sister in law and mother in law receive special thanks for being a part of my support system. A big hug to my kids, Anibho and Aran, for just being there in my life. Last but not the least this work would not have been possible without the constant help and unconditioned love from my husband. Thank You!
