Acknowledgement

First of all, I thank Almighty Allah, for His mercy and grace, which made me stand for the every challenge of life. It is all due to His unending blessings that gave me strength to face the hardships for the completion of this research work. Allah’s pleasure is my sole aim and it is He who guides us on the right path.

The completion of my thesis has been a joint effort in the sense that I have received abundant inspiration, encouragement, and assistance from my esteemed teachers, parents, colleagues, and friends. I take this opportunity to express my gratitude for the people who have been instrumental in the successful completion of the project.

At this moment of accomplishment, I feel privileged to express my deepest sense of gratitude, heartiest thanks and deep regards to my supervisor, Dr. Javid Iqbal, Sr. Assistant Professor, Department of Mathematical Sciences, BGSB University, Rajouri, (J & K). His guidance and encouragement at all stages of my research work motivated me for quality work. Without his guidance, this endeavor would not have been possible. I am indebted to him for teaching me how to appreciate science, to perform research, to communicate ideas, and to have a vision for the future. He has not been only the excellent teacher and supervisor, but also a valuable moral supporter on the personal front as he always welcomes to scientific discussions and listens to my difficulties.

I would like to extend my gratitude to the Head, Department of Mathematical Sciences, BGSB University, Rajouri, Dr. Zaheer Abbas for his valuable advices and suggestions. His concern and guidance means a lot to me and has always helped me to go ahead. I am also thankful to Prof. Mohammad Asger, Dean, School of Mathematical and Computer Sciences for his valuable and motivational suggestions.

I express my sincere and heartfelt gratitude to Dr. Madhu Jain, Associate Professor, Department of Mathematics, Indian Institute of Technology Roorkee, Roorkee, (Uttrakhand) for her consistent scholarly guidance, abundant benevolence, eternal motivation and magnanimous affection during the whole course of this research. Her innovative ideas, positive criticism, and encouraging words have always helped and inspired me to do the work in the best possible manner. Without her sincere help and constant guidance, it would not have been possible to portray this creation on the canvas.
I am highly indebted to her from the core of my heart for all the valuable scholarly suggestions imparted by her at various milestones of this journey.

I also owe my sincere thanks to the deepest sense of gratitude, reverence, and obligation to Dr. Chandra Shekhar, Associate Professor, Birla Institute of Technology and Science, Pilani, Rajasthan for his unconditional support, perpetual inspiration and diligent guidance during the accomplishment of this research. He has been a continuous technical support throughout the whole passage. He was always ready for help whenever needed in both scholarly and non-scholarly manner. I am also thankful to Mrs. Shikha Jaiswal, wife of Dr. Chandra Shekhar, for her extreme co-operation and encouragement during this tenure.

I am also thankful to Mrs. Shruti Gupta, Dr. Ram Singh, Mr. Aftab Mir, Mr. Tariq Bhatt and Prof. A. K. Malik for their cooperation and critical evaluation of my research work because without their constant support it would not have been possible for me to present my work in this shape. I would also like to acknowledge the BGSB University, Rajouri (J & K) where do I have a desirable platform for pursuing my doctoral degree.

My words have a special place for my family. Most of all, I am indebted to my parents for giving me an excellent upbringing and education and making many sacrifices for the same. I dedicate my thesis to my parents, for all their love, unconditional support, and understanding. They have always protected me with their love and care. I thank them from the core of my heart for everything they have done or prayed for me which finally carried me towards the path of success.

I am grateful to my fellow research workers and friends Dr. Rustam Abass, Priyanka Sharma, Princes Raina, Sonali Mangotra, Roma Verma, Rakesh Meena, Swati Sharma, Bhavya Tripathi, Dilawar Bhatt, Abid Hamid, Sachin Kumar, Mandeep Singh, Rajesh Bhatt, Nidhi, Priyanka Kumari, Said ul Islam, Mohd Asif, Attiq ul Rehman, Mohd Qasim, Gulzar Ahmad Wani, Shreekant Gupta and Shaista Farooq Lone for the spirit of solidarity and collectivism in the form of help at times during my research period.

At last, I would like to present my cordial thanks to Mr. Shoket Ali, who inspired me for the research work and ignited me to be in this field and also supported me at every possible time for completing this work successfully.

(Ather Aziz Raina)
