</table>
4.10. Significances of mean differences in the dimensions of learning score ‘as it is’ (LSA) within the manufacturing sector.

4.11. Significances of mean differences in the dimensions of learning score ‘as it is’ (LSA) within the telecom sector.

4.12. Significances of mean differences in the dimensions of learning score ‘as it is’ (LSA) within IT sector.

4.13. Significances of mean differences in the dimensions of learning dissatisfaction score (LDS) within the manufacturing sector.

4.14. Significances of mean differences in the dimensions of learning dissatisfaction score (LDS) within the telecom sector.

4.15. Significances of mean differences in the dimensions of learning dissatisfaction score (LDS) within the IT sector.

4.16. Significances of mean differences in the dimensions of Individual Competency score within the manufacturing sector.

4.17. Significances of mean differences in the dimensions of Individual Competency score within the telecom sector.

4.18. Significances of mean differences in the dimensions of Individual Competency score within the IT sector.
4.19 Significances of mean differences in the dimensions of Organization Competency score within the manufacturing sector.

4.20 Significances of mean differences in the dimensions of Organization Competency score within the telecom sector.

4.21 Significances of mean differences in the dimensions of Organization Competency score within the IT sector.

4.22 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Score ‘as it is’; Dependent Variable: Organization Competency (VCC4)

4.23 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Score ‘as it is’; Dependent Variable: Product development (VCC1)

4.24 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Score ‘as it is’; Dependent Variable: Employee development (VCC2)

4.25 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Score ‘as it is’; Dependent Variable: Quality & Technology development (VCC3)
4.26 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Dissatisfaction Score (LDS); Dependent Variable: OC Score (VCC4)

4.27 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Dissatisfaction Score (LDS); Dependent Variable: Product Development (VCC1)

4.28 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Dissatisfaction Score (LDS); Dependent Variable: Employee Development Competency (VCC2)

4.29 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Dissatisfaction Score (LDS); Dependent Variable: Quality & Technology Development (VCC3)

4.30 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Score ‘as it is’; Dependent Variable: Individual Competency (VDD4)

4.31 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Score ‘as it is’; Dependent Variable: Intellectual Competency (VDD1)
4.32 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Score ‘as it is’; Dependent Variable: People Competency (VDD2)

4.33 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Score ‘as it is’; Dependent Variable: Self Competency (VDD3)

4.34 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Dissatisfaction Score (LDS); Dependent Variable: IC Score (VDD4)

4.35 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Dissatisfaction Score (LDS); Dependent Variable: Intellectual Competency (VDD1)

4.36 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Dissatisfaction Score (LDS); Dependent Variable: People Competency (VDD2)

4.37 Results of step-wise Multiple Regression Analysis Independent Variables – Dimensions of Learning Dissatisfaction Score (LDS); Dependent Variable: Self Competency (VDD3)
CHAPTER 5

5.1 Mean Age and the work Experience
5.2 Particulars of the Respondents
5.3 Summary of the results of Multiple Regression Analyses-I
5.4 Summary of the results of Multiple Regression Analyses-II
