ACKNOWLEDGEMENTS

This study represents my journey in life through the past few years. I grew along with this research. This study has been made possible because of the blessings of my teachers and also well wishes of my family, friends and colleagues. I would like to take this opportunity to acknowledge all of them.

I wish to express my deepest sense of gratitude to my respected teacher and research guide, Prof. F. Ram, Director & Senior Professor, International Institute for Population Sciences (IIPS), Mumbai for his valuable guidance, suggestions, constructive academic discussions, continuous support and encouragement during my pursuit for completion of doctoral work. He has not only introduced me to the central theme of my doctoral work but also enlightened me with his erudite thoughts whenever I have approached him. During the last three years, whenever I meet him, I was delighted and gained more confidence to complete this work timely. He was kind enough to find sufficient time to guide me although his days were busiest as the Director of IIPS. I really have no word to express my deep sense of gratitude towards him, I can just say “Thank you Sir”.

I am also thankful to my advisory committee members, Prof. B. Paswan, Head, Deptt. of Population Policies & Programmes, IIPS and Dr. S.K. Mohanty, Deptt. of Fertility Studies, IIPS for their valuable comments and suggestions, which have definitely enriched my research work.

I would like to acknowledge Prof. Sian Curtis, Research Associate Professor at UNC Chapel Hill for her advices and providing me background information of calendar data available in third round of National Family Health Survey, which I have used in my doctoral work. I am also deeply grateful to Prof. S.N. Dwivedi, Deptt. of Biostatistics, AIIMS, New Delhi for his valuable suggestions and constructive comments.

I would like to thank all the faculty member of the IIPS, whose teaching and support is laid my career to follow their path as a researcher. Especially, I would like to express my sincere thanks to Prof. T.K. Roy, Prof. Usha Ram, Prof. M. Guruswamy, Prof. R.B. Bhagat, Prof. S. Unisa, Prof. T. V. Shekher and Dr. Manoj Alagarajan for their moral support and valuable suggestions. Their concern about the completion of my
thesis was remarkable. I would like to thank Prof. (Mrs.) S. Parasuraman and Prof. S.K. Singh for his valuable comments and taking personal interest at the time of presentation of this thesis.

I must thank to Mr. M. Sekar, Assistant Registrar (Academic), IIPS and his office staff for providing a great support during study period. I acknowledge Mr. D. D. Mestri and Mr. Praveen Kumar and other awesome library staff for their immense help and cooperation while accessing book and articles.

I am also thankful to Dr. Bidhubhusan Mahapatra, Population Council for providing help. The great intellectual environment of IIPS and friends from this institute played an important role to complete this research work. Thanks are also due to my friends Mrs. Amrita, Mrs. Kirti, Mrs. Sangeeta, Ms. Mousumi, Mrs. Itismita, Ms. Akansha, Mrs. Naboneeta, Mrs. Mamata and all others for creating joyous atmosphere at IIPS. I would like to acknowledge the support which I had received from Mr. Ghanshyam Verma and Mr. Vasu Gowda.

The junior Research fellowship awarded to me by the University Grant Commission is also acknowledged for aiding me in regard to the finance pertaining to the research.

I would like to express gratitude to The Population Reference Bureau (PRB), Washington, DC and U.S. Agency for International Development (USAID) for providing me opportunity to participate in the 2012-2013 Policy Communication Fellows program, where I get valuable ideas related to policy communication.

The person, who deserves great acknowledgement and thanks, as well as gratitude, is my husband, Dr. Laxmi Kant Dwivedi, Assistant Professor, Deptt. of Mathematical Demography & Statistics, IIPS. The study remains incomplete without the mention of my soul-mate and loving husband. He is most responsible for helping me complete the writing of this thesis as well as the challenging research that lies behind it. He has been a friend and mentor. Without his encouragement and constant guidance I could not have finished this dissertation. He was always there to share his research experience and talk about new ideas. He has also helped me with the proof-reading and editing, when I was too jaded to be able to spot even the most obvious mistakes. Thank you, for the time and effort that you put in my thesis.
I will fail in my duty if I forget to offer my heartfelt thanks to my loving sisters-in-law Mrs. Archana and Mrs. Chetana for providing every support and encouragement. I am very much indebted to my brother-in-law Dr. S. K. Dwivedi, Assistant Professor, BHU, Varanasi and bhabhi Mrs. Beena Dwivedi for their moral support, guidance and constant encouragement.

I am also highly grateful to my brother Mr. Varun Dixit, Sister Mrs. Vandana and Bhabhi Mrs. Nidhi. This study would not have completed without their vital support. Thanks to all my adorable niece Samagya, Abhigya, Raheeni and Kushi and nephew Shreesh, Pransu, Omm and Parth.

I am also indebted to my parents-in-law Prof. C. M. Dwivedi & Mrs. Jamwanti Dwivedi, who supported me in every possible way to see the completion of this work. In fact, they are the role model of my life.

I deeply miss my late father Vyas Dixit, chief engineer, who left us too soon and not with me to share this joy. I am also extremely indebted to my Mother Mrs. Durga Dixit, for her constant moral support.

Finally, I would like to thank everybody who was important to the successful realization of the thesis, as well as expressing my apology that I could not mention personally one by one.

Last but not least, I thank the one above all of us, the omnipresent God for keeping me cheerful and rooted throughout the period.

January, 2014                                      Priyanka Dixit
