Chapter I: Introduction
1.1 Significance of Maternal and Child Health
1.2 Integration and Inter-Linkages between Health Care Services
1.3 Review of Previous Studies
1.3.1 Association between Antenatal Care and Institutional Delivery
1.3.2 Association between Antenatal Care and Child Immunization
1.3.3 Association between Utilization of MCH Services for First Observe Birth and Subsequent Births
1.3.4 Linkages between Utilization of MCH Services and Subsequent Contraceptive Use
1.4 Rationale of the Study
1.5 Research Questions
1.6 Objectives of the Study
1.7 Research Hypotheses
1.8 Conceptual Framework
1.9 Organization of the Thesis

Chapter II: Levels, Trends and Differentials in Consistent Utilization of Maternal and Child Health Care Services
2.1 Introduction
2.2 Data and Methods
2.3 Results Based on Utilization of Different Services for the Most Recent Birth
2.4 Results of Utilization of a Service across Successive Births
2.5 Discussion and Conclusions

Chapter III: Linkages between Utilization of Two Different Health Care Services
3.1 Section I: Impact of Antenatal Care Visits on Institutional Delivery
3.1.1 Introduction
3.1.2 Data
3.1.3 Measures
3.1.3.1 Outcome Variable
3.1.3.2 Treatment Variable
3.1.3.3 Matching Variables
3.1.3.4 Household Characteristics
3.1.3.5 Demographic Characteristics
3.1.3.6 Individual Characteristics
3.1.4 Statistical Procedures
3.1.4.1 Description of Propensity Score Matching Analysis
3.1.4.2 Why Propensity Score Matching
3.1.4.3 Calculation of Propensity Score
3.1.4.4 Defining the Impact of Frequency of ANC Visits
3.1.4.5 Counterfactual Model
