ACKNOWLEDGEMENT

I would like to express my sincere gratitude to my supervisor and mentor Dr. Sreya Chattopadhyay, Assistant Professor, Department of Physiology, for her continuous support during my Ph.D. study. It was her continuous care, support and excellent guidance that provided me the atmosphere to nurture my research skills and perform my research work. Her high spirit and love for science taught me and made me believe that obstacles and roadblocks actually symbolizes that you are on the right path to success. She has not only provided me the freedom to execute my experimental proceedings but also guided me when my steps faltered. I am thankful to her for patiently correcting my manuscripts and helping me to overcome my crisis situations. I am blessed for being a part of Sreya Chattopadhyay Laboratory (SCL). I will always remember a motivated saying which she often used to say - ‘whenever all doors are closed God opens a window for you, you just need to find it out’

I would like to thank Prof. Sanjit Dey (former), and Prof. Debasish Bandyopadhyay (present) Head, Department of Physiology Calcutta University, for allowing me to use laboratory facility and extending every academic co-operation.
I am thankful to Dr. Arghya Adhikary, CRNN for helping me in performing my experiments in his laboratory and fulfilling all the requirements to make ends meet during the experiments.

I express my deepest gratitude to The Director, CRNN and the Coordinator, DBT-CU-IPLS, CU for allowing me to use the Central Instrument Facility.

I owe a lot to my lab mates who made my job much easier. I would like to thank Ms. Sudeshna Mukherjee and Mr. Sayan Ghosh for supporting me with my ideas during my initial days of joining SCL, pushing me to present it before our mentor and helping me in data analysis. I am also thankful to Ms. Payal Gupta, my new friend, for her constant suggestions, immense help in standardizing new protocols and improving my writing skills. Enthusiastic new members of our lab, Ms. Priyanka Chakraborty and Mr. Suddha Satwa Sen were an added advantage during my journey. I warmly heartedly thank the other Research Scholars of The Department of Physiology for their help during my tenure.

I extend my heartfelt thanks to the technical staff of the Department of Physiology and especially to Mr. Sumanta Ghosal for his advice and support.
I am forever in debt to Dr. Siddhartha S Saha, my husband, without whose support I would never have been able to start and enjoy such a blissful journey. He took every possible trouble to let me do my job peacefully.

I would like to take this opportunity to thank one of my closest friends, Ms. Thumree Sarker, for always extending her helping hand during the thick and thin of my journey and keeping me happy in this city far away from my hometown.

I must acknowledge West Bengal-DBT for funding my project that provided financial assistance to my research work.

Above all I wish to thank my parents and in-laws who were there for me all the way and supported me throughout my research period. It was their patience and moral support that has allowed me to complete my thesis.

Finally I thank almighty God, for His blessings which provided me strength to carry on my work and bring it to its completion with full satisfaction.
