CHAPTER - I: ........................................................................................................... 1
1. INTRODUCTION................................................................................................... 1
   1.1. A PRELUDE ................................................................................................. 1
       1.1.1. The Correspondence between Science and Environment .................... 2
   1.2. CONCEPTS IN SCIENCE (CS) ................................................................ 3
       1.2.1. The concepts in science vis-a-vis environment .................................. 3
       1.2.2. Nature of concepts in science in relation to environment ................. 4
       1.2.3. Need of concepts in science to understand environment ............... 5
       1.2.4. Science as a curricular subject in secondary education .................. 5
   1.3. APTITUDE IN SCIENCE (AS) .................................................................. 6
       1.3.1. The aptitude in science vis-a-vis environment .................................... 6
       1.3.2. Nature of aptitude in science in relation to environment .................. 7
       1.3.3. Need of aptitude in science in relation to environment ..................... 8
   1.4. AWARENESS OF ENVIRONMENTAL POLLUTION (AEP) ...................... 9
       1.4.1. The development of awareness of environmental pollution ............. 9
       1.4.2. Science in relation to environmental pollution awareness ............... 10
       1.4.3. Need of awareness of environmental pollution ................................. 10
   1.5. STATEMENT OF PROBLEM OF THE STUDY ........................................ 11
   1.6. RATIONALE OF THE PRESENT STUDY ............................................... 12
       1.6.1. Conceptual framework of the study .................................................. 13
   1.7. DELIMITATION OF THE STUDY ............................................................. 14
   1.8. THE SIGNIFICANCE OF THE STUDY ..................................................... 15
       1.8.1. Educational significance of the study ................................................. 15
       1.8.2. Research significance of the study .................................................... 16
       1.8.3. Social significance of the study ........................................................ 16
   1.9. ASSUMPTIONS ......................................................................................... 16

CHAPTER- II: ........................................................................................................... 18
2. PRESENT STUDY AND THE REVIEW OF THE RELATED LITERATURE ....... 18
   2.1. INTRODUCTION ......................................................................................... 18
   2.2. RELATED STUDIES: ............................................................................... 18
       2.2.1. RELATED STUDIES: CONCEPTS IN SCIENCE ......................... 18
2.2.1.1. General trends of concepts studies (in yester years) __________ 18
2.2.1.2. Studies on concepts in science abroad ___________________________ 19
2.2.1.3. Studies on concepts in science in India ___________________________ 21
2.2.2. RELATED STUDIES: APTITUDE IN SCIENCE ___________________________ 23
2.2.2.1. General trends of the aptitude in science studies (in yester years) _______ 23
2.2.2.2. Studies on aptitude in science abroad ___________________________ 24
2.2.2.3. Studies on aptitude in science in India ___________________________ 25
2.2.3. RELATED STUDIES: AWARENESS OF ENVIRONMENTAL POLLUTION 27
2.2.3.1. General trends of the studies on awareness of environmental pollution (in yester years) ___________________________ 27
2.2.3.2. Studies on awareness of environmental pollution abroad ___________________________ 28
2.2.3.3. Studies on awareness of environmental pollution in India ___________________________ 29

2.3. CRITICAL APPRAISAL OF THE RELATED STUDIES ___________________________ 32
2.3.1. Critical appraisal of the related studies on concepts in science __________ 32
2.3.2. Critical appraisal of the related studies on aptitude in science __________ 33
2.3.3. Critical appraisal of the related studies on awareness of environmental pollution. ___________________________ 35

2.4. THE PRESENT PROBLEM AGAINST THE BACKDROP OF PREVIOUS STUDIES ___________________________ 36
2.4.1. Summary of the studies Identifying Research Gaps: ___________________________ 36
2.4.2. Research Questions: ___________________________ 37
2.5. OBJECTIVES OF THE STUDY: ___________________________ 37
2.6. HYPOTHESES (H0-24H0) OF THE STUDY: ___________________________ 38
2.7. THE TERMS DEFINED: ___________________________ 40
2.7.1. CONCEPTS IN SCIENCE ___________________________ 40
2.7.2. APTITUDE IN SCIENCE ___________________________ 46
2.7.3. AWARENESS OF ENVIRONMENTAL POLLUTION ___________________________ 48

CHAPTER-III ___________________________________________________________________________ 51

3. PROCEDURE OF THE STUDY________________________________ 51
3.1. INTRODUCTION __________________________________________ 51
3.2. PREPARATION OF TEST ON CONCEPTS IN SCIENCE (SKMCS) ______ 51
3.2.1. Selection of subject area for the study. ___________________________ 51
3.2.2. Selection of the Content Area for the Concepts in Science Test. ________ 52
3.2.3. Broad Analysis of the content area as required for the Concepts in Science Test. 53
3.2.4. Opinion of the Resource Persons with respect to the dimensions of the Concepts in Science Test. ___________________________ 54
3.2.5. Development of the Test Items on Concepts in Science Test. __________ 54
3.2.7. Selection of the Test Items on Concepts in Science. __________ 55
3.2.8. Try out of the Test Items in the Concepts in Science Test. __________ 56
3.2.9. Statement of the facility indices and the discrimination indices of the items in the concepts in science test. ___________________________ 59
3.2.10. Presentation of the subtest–subtest and subtest-total correlation of the Concepts in science test ___________________________ 60
3.2.11. Final Selection of the Test Items in the Concept in Science Test: ________ 61

3.4.4. Opinion of the Resource Persons with respect to the dimensions of the Awareness of Environment Pollution Test. 

3.4.5. Development of the Test Items on Awareness of Environment Pollution Test.  

3.4.7. Selection of the Test Items on Awareness of Environment Pollution. 

3.4.8. Try out of the Test Items in the Awareness of Environment Pollution Test. 

3.4.9. Statement of the facility indices and the discrimination indices of the items in the Awareness of Environmental Pollution test.  

3.4.10. Presentation of the subtest-subtest and Subtest-total correlation in the case of Awareness of Environmental Pollution test. 

3.4.11. Final Selection of the Test Items in the Awareness of Environment Pollution Test. 

3.4.12. Representation of the Dimension-Cum-Content Chart of the Awareness of Environmental Pollution Test: 

3.4.13. Finding out the Time Schedule for the Awareness of Environment Pollution Test: 

3.4.14. Selection of the Sample for the Awareness of Environment Pollution Test: 

3.4.15. Sample Frame for the Awareness of Environmental Pollution Test: 

3.4.16. Administration of the Awareness of Environment Pollution Test. 

3.4.17. Evaluation of the Awareness of Environment Pollution Test Sheet: 

3.4.18. Re-administration of the test Items. 

3.4.20. Presentation of the test and the retest scores of the students in Awareness of Environmental Pollution test.  

3.4.21. Setting up the Norms for the scores of Awareness of Environment Pollution Test.  

3.5. Determination of the Statistical Measure of the scores of the students in Concepts in Science Test, Aptitude in Science Test and Awareness of Environmental Pollution Test. 

3.6. Graphical presentation of the scores of the students in Concepts in Science Test, Aptitude in Science Test and Awareness of Environmental Pollution Test.(OGIVE) 

3.7. Determination of Significance of differences in Mean Scores of the students in Concepts in Science Test, Aptitude in Science Test and Awareness of Environmental Pollution Test by using ANOVA. 

3.8. Determination of Significance of differences in Mean Scores of the students in Concepts in Science Test, Aptitude in Science Test and Awareness of Environmental Pollution Test by the t-tests. 

3.9. Finding out the significance of difference in Mean scores in the Environmental Pollution Awareness test of students belonging to High score group and Low score group in Concept in Science test. 

3.10. Finding out the significance of difference in Mean scores in the Environmental Pollution Awareness test of the students belonging to high score group and Low score group in Aptitude in Science test. 

3.11. Determination of Inter-relatedness among the scores in the Concept in Science Test, Aptitude in Science Test and Awareness of Environmental Pollution Test. 

3.12. Developing a Multiple Regression Equation among the scores in the Concept in Science Test(CS), Aptitude in Science Test(AS) and Awareness of Environmental Pollution Test(AEP).

CHAPTER-IV _____________________________________________________ 107

4. PRESENTATION AND ANALYSIS OF THE DATA______________________ 107
4.1. INTRODUCTION ____________________________________________ 107
4.2. ON CONCEPTS IN SCIENCE TEST _____________________________ 107
    4.2.1. Presentation of the frequency distribution of the scores in the Concept in Science test of the students (sex-wise and pollution and non-pollution zone wise) : SPSS-17 _____________________________ 107
    4.2.2. Presentation of distribution of Cum. % frequency in Concept in Science Scores ___________________________________________ 109
    4.2.3. Graphical representations of the scores in the Concept in Science test of the students (sex-wise and zone wise) through Ogives ___________________________________________ 109
    4.2.4. Particulars showing the statistics of the scores in the concepts in science test of the students (sex-wise and zone- wise) ___________________________________________ 113
    4.2.5. ANOVA in determination of the significance of difference in mean scores in the Concept in Science test (sex-wise and zone wise) ___________________________________________ 113
    4.2.6. Finding out the significance of difference in mean scores of the students in the concept in science test (sex-wise and zone/location wise) by the t-test __________ 115
    4.2.7. Two factor interaction in Concepts in Science test for Levels of A (Locations) at each level of B (Sexes): ___________________________________________ 116
4.3. ON APTITUDE IN SCIENCE TEST: _____________________________ 117
    4.3.1. Presentation of the frequency distribution of the scores in the Aptitude in science test of the students (sex-wise and pollution and non-pollution zone wise): SPSS-17 ______________________ 117
    4.3.2. Presentation of distribution of Cum. % frequency in Aptitude in Science Scores ___________________________________________ 119
    4.3.3. Graphical representations of the scores in the Aptitude in Science test of the students (sex-wise and zone wise) through Ogives ___________________________________________ 119
    4.3.4. Particulars showing the statistics of the scores in the Aptitude in Science test of the students (sex-wise and zone- wise) ___________________________________________ 123
    4.3.5. ANOVA of 2x2 factorial designs in determination of the significance of difference in mean scores in the Aptitude in Science test (sex-wise and zone wise) ______________________ 123
    4.3.6. Finding out the significance of difference in mean scores of the students in the aptitude in science test (sex-wise and zone/location wise) by the t-test ___________ 125
    4.3.7. Two factor interaction in Aptitude in Science test for Levels of A (Locations) at each level of B(Sexes): ___________________________________________ 126
4.4. ON AWARENESS OF ENVIRONMENTAL POLLUTION TEST: ___________ 126
    4.4.1. Presentation of the frequency distribution of the scores in the Awareness of Environmental Pollution test of the students (sex-wise and zone wise) ________ 126
    4.4.2. Presentation of distribution of Cum. % frequency in AEP Scores _______________________________ 129
    4.4.3. Graphical representations of the scores in the AEP test of the students (sex-wise and zone wise) through Ogives ___________________________________________ 129
    4.4.4. Particulars showing the statistics of the scores in the Awareness of Environmental pollution test of the students (sex-wise and zone- wise) ___________________________________________ 133
    4.4.5. ANOVA of 2x2 factorial designs in determination of the significance of difference in mean scores in the Awareness of Environmental Pollution test (sex-wise and zone wise) ANOVA ___________________________________________ 133
    4.4.6. Finding out the significance of difference in mean scores of the students in the awareness on environmental pollution test (Sex-wise and zone wise) by the t-test ___________________________________________ 134
4.4.7. Two factor interaction in Awareness of Environmental Pollution test for Levels of A (Locations) at each level of B (Sexes): 135

4.5. ON INTERVARIABLES 136

4.5.1. Determination of INTER CORRELATION among the scores of concept in science test, aptitude in science test and awareness of environmental pollution test. 136

4.5.2. Effect of Concept in Science on Environmental Pollution Awareness 137

4.5.3. Effect of Aptitude in Science on Environmental Pollution Awareness 137

4.5.4. Finding out regression equation of the awareness of environmental pollution test on concept in science test and corresponding coefficient of correlation. 138

4.5.5. Finding out regression equation of the awareness of environmental pollution test on aptitude in science test and corresponding coefficient of correlation. 139

4.5.6. Finding out multiple regression equation of the awareness of environmental pollution test on concepts in science and aptitude in science test and corresponding coefficient of correlation. 140

4.6. Interpretation of the data and conclusion of the study 141

4.6.1. From the statistical measures the following conclusions were drawn: 141

4.6.2. From the graphs (Paired Ogives) representing distributions Sex wise and Location of School (Pollution and Non-Pollution Zone) wise. The following conclusions were drawn: 142

4.6.3. Hypotheses Testing 145

4.6.3.1. On the Concept in Science Test: 145

4.6.3.2. On the Aptitude in Science Test: 145

4.6.3.3. On the Awareness of Environmental Pollution Test: 146

4.6.3.4. On Inter Correlation among the variables [concept in science (CS), aptitude in science (AS) and awareness of environmental pollution (AEP)]. 147

4.6.3.5. Multiple regression equation of DV on IV and Regression Coefficient 148

CHAPTER V: 150

5. CONCLUSION AND SUMMARY OF THE STUDY 150

5.1. CHAPTER INTRODUCTION 150

5.2. FINDINGS: 150

5.3. THE LIMITATIONS OF THE STUDY: 152

5.4. DISCUSSION AND RECOMMENDATION 152

5.5. SCOPE FOR FURTHER STUDIES: 155

5.6. IMPLICATION OF THE STUDY 155

5.6.1. Educational implications of the study: 155

5.6.2. Research Implication of the study: 155

5.6.3. Social Implications of the study: 156

5.7. CONCLUSIONS: 156

5.8. SUMMARY OF THE STUDY: 156

5.8.1. Introduction 156

5.8.2. Objectives: 160

5.8.3. Hypotheses: 162

5.8.4. The terms defined: 164

5.8.4.1. Concepts In Science 164

5.8.4.2. Aptitude In Science 164

5.8.4.3. Awareness Of Environmental Pollution 165

(xii)
5.8.5. Delimitation of the study: ___________________________ 165
5.8.6. Procedure: ___________________________ 167
5.8.6.1. Concepts in Science ___________________________ 167
5.8.6.2. Aptitude in Science ___________________________ 168
5.8.6.3. Awareness on Environmental pollution ___________________________ 168
5.8.7. Summary of Tests ___________________________ 169
5.8.8. Statistical Techniques used in preparation of the tests: ___________________________ 169
5.8.9. Presentation of data collected: ___________________________ 169
5.8.10. Analysis of data: ___________________________ 170
5.8.11. Results of testing null Hypotheses ___________________________ 170
5.8.12. Findings: ___________________________ 170
5.8.13. The significance of the study: ___________________________ 172
5.8.14. Conclusion ___________________________ 173

BIBLIOGRAPHY ___________________________________________ 174

APPENDICES ___________________________________________ 182
