I. INTRODUCTION 1-48

1.1 Motivation

1.2 Literature Survey

1.2.1 Persistence of child malnutrition and its measurements

1.2.2 The inequality measurement of (mal) nutrition

1.2.2A. Slope index of Inequality

1.2.2B. Concentration Index of Inequality

1.2.3 Major determinants of child malnutrition

A. Household-level Characteristics

1. Income or Ethnicity

2. Place of Residence

3. Infrastructure

B. Intra-Household Characteristics

1. Birth Order

2. Sex of the Child

3. Maternal Characteristics

3.1 Maternal Education

3.2 Maternal Education Status

3.3 Mothers' Health Awareness and Child Nutrition

3.4 Other Maternal Characteristics

4. Other Factors

1.2.4 Impact of Different Nutritional Projects on the Child Nutrition Level

1.2.5 ICDS and Child Nutrition

1.2.5A ICDS programme and its infrastructure

1.2.5B Impact of ICDS
1.3 Objectives of the Study
1.4 Data Base
1.5 Methodology
   1.5.1 Inequality Index
      1.5.1A Malnutrition Gap Index
      1.5.1B Group Utilization Lorentz Profile (GULP) and Group Analogue of the Gini Coefficient
      1.5.1C Gini Coefficient
      1.5.1D Concentration Index
   1.5.2 Bivariate Probit
   1.5.3 Impact Evaluation and Propensity Score Matching
1.6 Conceptual Framework
1.7 Conclusion to the Chapter

II. CHILD MALNUTRITION IN INDIA: MEASUREMENT, REGIONAL DISPARITY AND CONCENTRATION

2.1 Introduction
2.2 Data Base and Methodology
2.3 Results and Discussion
   2.3.1 Measurement and Child Malnutrition by WHO Norm: Regional Level analysis
   2.3.2 Depth of Stunting
   2.3.3 Inequality of Child Nutrition
      2.3.3.1 Inter Group Inequality
      2.3.3.2 Inter Personal Inequality with respect to Wealth Index
      2.3.3.3 Inter Personal Inequality among the Stunted Children Only
2.4 Conclusion

III. SOCIO ECONOMIC DETERMINANTS OF CHILD STUNTING

3.1 Introduction
3.2 Data Base and Methodology
3.3 Results and Discussion
   A. Household Characteristics
B. Mothers Characteristics
C. Children Characteristics

3.4 Conclusion to the Chapter

IV. BARRIERS TO ACCESSIBILITY TO ICDS SERVICES 73-91
4.1 Introduction
4.2 Data Base and Methodology
4.3 Analysis and Results
   4.3.1 Participation in ICDS: An Exploration
      4.3.1A India as a Whole
      4.3.1B Region Specific
   4.3.2 Supply Side Factors
   4.3.3 Locating the Barriers: An Econometric Analysis
4.4 Conclusion to the Chapter

V. ICDS AND ITS IMPACT EVALUATION: A CASE STUDY 92-135
5.1 Introduction to the Chapter
5.2 Sampling Method
   5.2A Selection of Districts
   5.2B Selection of Blocks
   5.2C Selection of Villages and Households
5.3 Sampling Characteristics
   5.3A Characteristics of the Households
   5.3B Characteristics of the ICDS Centres
5.4 Access to and Services at ICDS
   5.4A An Exploration
   5.4B Causal Analysis to Capture the Barriers
5.5 Impact of ICDS on Height of the Programme
5.6 Summary and Conclusion of the Chapter
VI. CONCLUSION AND POLICY RECOMMENDATIONS  136-142

6.1 Background and Objectives of the Study

6.2 Summary of the Findings

Chapter 2
Chapter 3
Chapter 4
Chapter 5

6.3 Policy Recommendation

ANNEXURE  143-154

Annexure 1 Questionnaire for mothers with children
Annexure 2 Questionnaire for AWC

REFERENCE  155-167

LIST OF CORRECTIONS  i-iv
