ACKNOWLEDGEMENTS

With great sense of gratitude and humility, I acknowledge the unlimited support, critical yet generous guidance, huge disciplined liberty and trust bestowed upon me throughout my present Ph.D. work, by my supervisors, Prof. Joydip Mukhopadhyay, Presidency University, Kolkata, Dr. Gautam Ghosh, Associate Professor in Geology, Department of Geology, Presidency University, Kolkata and Dr. P. V. Ramesh Babu, Additional Director (R&D), Atomic Minerals Directorate for Exploration and Research (AMD), Department of Atomic Energy, Government of India, Hyderabad. The constant source of inspiration, initiative and guidance of Prof. Mukhopadhyay have been the chief driving force to steer me from the initial days of research to the ultimate of thesis submission. He has been and will remain my true “Friend, Philosopher and Guide” in all possible senses. I owe greatly to Dr. Gautam Ghosh for his constant encouragement and helpful attitude towards me. His reticent yet effective discussions, both in field and in laboratory, on many structural aspects, have been a great support to me throughout my research work. Dr. Ramesh Babu, despite being extremely busy due to his official capacity, always remained keen about my progress of work for a timely completion of the Ph.D. programme. It is his constant encouragement and driving force that finally outweighed my habitual procrastination and this thesis saw the day of light. I owe him greatly.

I am also thankful to Dr. Anjan Chaki, former Director and Shri P. S. Parihar, Director, AMD, Hyderabad, for permitting me to pursue my Ph.D. programme as well as providing me the facilities of AMD laboratories during my dissertation work. I acknowledge them greatly. I thank Prof. H.N. Bhattacharyay, former HOD, Department of Geology, Presidency University, Kolkata, for his permission to utilize the laboratory facilities of the Department of Geology, Presidency University, Kolkata.

I also gratefully acknowledge the generous funding of the AMD-BRNS project by the Board of Research on Nuclear Sciences (BRNS), Department of Atomic Energy, Government of India, for the present Ph.D. work.
I also express my deepest sense of acknowledgement to Prof. Tapas Bhattacharyya, Department of Geology, University of Calcutta, for his generous help in technical and administrative fronts right from the days of course-work till the thesis submission. Shri N.R.R. Ecka, Scientific Officer-E, AMD, Shillong, is specially thanked for his constant help and support both in field as well as in the laboratory since the discovery of radioactive horizons in Mankarchua area. My special thanks are also due to my friend, Smt. Pampa Bhattacharyya, for her constant help and encouragement during the ripe hours of my thesis writing and submission. I deeply owe to all of them.

Sincere thanks are also due to many persons who either directly or indirectly helped me at times during my Ph.D. programme. To mention a few, are Dr. K. Satyanarayana, Head, Chemistry group, AMD, Hyderabad, Dr. P. K. Tarafder, Chemistry Lab, AMD, Jamshedpur, Shri Manoj Sandilya, Physics Lab., AMD, Jamshedpur, Ms. Saheli De, JRF, AMD-BRNS Project, at Presidency University, Kolkata, Prof. Abhijit Bhattacharya of EPMA Lab., IIT, Kharagpur. Logistic support of Petrology Lab., AMD, Jamshedpur, area also thankfully acknowledged.

I also thank my life partner, Smt. Debjani, and my daughters, Ms. Kirtika and Ms. Deepjyotika for their immense sacrifice, co-operation, and moral support throughout my research days without whom my work would have remained incomplete. I also express my deep sense of gratitude to my mother, Smt. Niva Chakrabarti and my departed father Late, Shri Sudhir Ranjan Chakrabarti, who have always been the source of encouragement to me and their expectations have given me the inner strength to strive for accomplishment. I pray for their blessings. I express my deep sense of gratitude to my elder brother, Shri Subir Chakrabarti and my sister-in-law, Smt. Shreelekha Chakrabarti for their unlimited source of inspiration, love and support.
