1) As significance of Shoolaghna effect of Panchakol is proved in this thesis by the methods of clinical studies, it should also be proved by experimental studies & by animal experiments.

2) Phyto-chemical studies of the panchakol (separately and togetherly) should be done.

3) Neurochemical & Neurophysiological studies of Shoolaghna i.e. analgesic action of Panchakol should be done.

4) Any potent form of Panchakol like Panchakol Ghanavati, water or alcoholic extract of Panchakol or any khalvi Rasayan Kalpa of Pachakol like Panchakol Kajjali, Panchakol - Parpati etc. may boost up the efficacy.
