ACKNOWLEDGEMENTS

I place on record my profound feeling of reverence and gratitude to Dr. V. Krishnan and Dr. A. Chennakesava Reddy, for their inspiration, guidance and plentiful support during the course of my research work. In spite of their busy schedules they have spared their valuable time, in the preparation of the thesis report. I shall forever cherish my association with them for the exuberant encouragement, perennial approachability and absolute freedom of thought and action I have enjoyed during the past few years.

I place on record my heartfelt thanks to the authorities of the Jawaharlal Nehru Technological University, Hyderabad, for providing an opportunity to work for my Ph. D. degree under the part time, external registration scheme.

I express my hearty and sincere gratefulness to the management of M.S. Ramaiah Institute of Technology, Bangalore and Principal Dr. K.S. Rajanandam for extending the necessary facilities.

Immense thanks are due to Professor M.K. Muralidhara, Head of the Mechanical Engineering Department, M.S. Ramaiah Institute of Technology, Bangalore for providing the facilities in the department.
I am very much thankful to Dr. H.B. Niranjan, Principal G. S. S. Institute of Technology, Bangalore for his valuable suggestions and inspiration for the completion of the thesis work.

I am also thankful to my colleagues R. K. Hegde, Veranna B. Nasi, M.V. Mahesh, S. Rajesh, D. Venkatesh and P. N. Girish babu for their co-operation throughout the research work.

I must express my admiration to my wife S.R. Smitha and my son Pratheek.N for their encouragement, patience, sacrifice and understanding during this endeavor.
