I take this opportunity to thank all the respondents who have spared their valuable time in providing me the data for the research, otherwise it would have been impossible to complete the task in time. I thankfully acknowledge the role of my teachers, well-wishers, friends and relatives for their inspiration and encouragement.

I shall fail in my duty if I do not express my gratitude to all those authors whose works I have consulted to. It would not be fair if I do not mention my thanks to my wife Reena, a homoeopathic doctor and my only kid Bunty who bears all the irregularities, negligence happily and uncomplainingly let the research work disrupt their life-cycle. I take this as an opportunity to thank my father-in-law Sri S.K.Mahapatra, a retired bank officer, my mother-in-law, my family members specifically to my brother Sri B.K.Mishra, a bank officer, two brother-in-laws, two sisters and sister-in-laws along with their children for their constant inspiration and support.

I owe a deep sense of gratitude to my beloved parents Sri Bhagabat Mishra and Smt. Gouri Devi, who I believe will be the happiest persons in the world seeing their son’s labour bringing fruits. It is, indeed, they who had inducted me into this pious mission of teaching.

Last but not the least, I submit my deep sense of gratitude to my beloved KUNA BHAINA Prof. (Dr.) Bidhu Bhusan Mishra, who is much more than my submission, without whom simply anything and everything is impossible in the earth at least for me. He always stands in the role of a light house, a source of inspiration not only to guide me but also into my rescue. Without him simply I cannot dare to think for the completion of this work. Also I am grateful to my beloved Rosi Bhauja and both her sons for their support and cooperation during the work. Finally, I am grateful to the ALMIGHTY without HIS blessing nothing will happen on this earth.
