LIST OF TABLES

1. Categorywise Steel Production in RSP ..... 2
2. Tubemakor Steel Production ..... 4
3. Mould dimensions. ..... 57
4. Obtainable slab widths for different ingots types. ..... 60
5. Location of crack edges in hot rolled coils ..... 67
6. Observations of Microstructural study. ..... 69
7. Details of Deoxidation. ..... 78
8. Study of ingot samples. ..... 88
9. Slab edge observations. ..... 90
10. Effect of Manganese. ..... 92
11. \( \chi^2 \) test for Manganese effect. ..... 93
12. Effect of Sulphur (Deoxidation Method-I) ..... 95
13. \( \chi^2 \) test for the effect of Sulphur. ..... 96
14. Effect of Manganese to Sulphur ratio. ..... 98
14A. \( \chi^2 \) test for the effect of Manganese to Sulphur ratio. ..... 99
15. Effect of Silicon (Deoxidation Method-I) ..... 100
16. \( \chi^2 \) test for Silicon effect. ..... 101
17. Effect of Sulphur and Silicon ..... 103
18. Effect of Silicon (Method-II) ..... 104
19. Effect of Silicon (Method-III) ..... 105
20. Effect of Silicon (Method-V) ..... 106
21. Effect of Alumium ..... 110
22. Recoveries of Manganese and Silicon (Method-I). ..... 112
23. Recoveries of Manganese and Silicon (Deoxidation Method-II). ..... 113
24. Effect of Silicon on ingot to slab yield (Deoxidation Method-I) ..... 115
25. Effect of Silicon on ingot to slab yield (Method-II). ..... 116
26. Effect of Silicon on ingot to slab yield (Method-III). ..... 117
27. Effect of Silicon on ingot to slab yield (Method-V). ..... 118
28. Effect of Aluminium on ingot to slab yield (Method - IV). 119

29. Effect of Silicon and ingot heating time on edge cracking. 126

30. Effect of mould on edge cracking. 128

31. $\chi^2$ test for the effect of mould. 129

32. Partial pressures at 90% solidification for Mn-Si deoxidation (Carbon - .06%). 148

33. -do- (Carbon - .08%). 149

34. -do- (Carbon - .10%). 150

35. -do- (Carbon - .12%). 151

36. Partial pressures at 90% solidification for Mn-Si-Al deoxidation (Carbon - .08%). 158

37. -do- (Carbon - .10%). 159

38. -do- (Carbon - .12%). 160
