Contents

Chapter 1: Pd/C mediated alkynylation of N-heterocycles  Page13-34

1.1. Introduction
1.2. Types of palladium/carbon (Pd/C)
1.3. Mechanism of Pd/C mediated alkynylation
1.4. Pd/C catalysed Sonogashira coupling reaction of N-heterocycles
   1.4.1. In anhydrous media
   1.4.2. In organic solvent/water mixture
1.5. Conclusion
1.6 References

Chapter 2: Pd/C-mediated synthesis and anticancer activities of 4-alkynylthieno[2,3-d]pyrimidines  Pages35-91

2.1. Introduction
2.2. Present Work
2.3. Results and Discussion
2.4. Conclusion
2.5. Experimental
2.6 References
2.7 Appendix

11
Chapter 3: Pd/C-mediated synthesis and anti cancer properties of mono and dialkynyl substituted indazoles

3.1. Introduction
3.2. Present Work
3.3. Results and Discussion
3.4. Conclusion
3.5. Experimental
3.6. References
3.7 Appendix

Chapter 4: Pd/C-mediated synthesis of alkynyl pyrazoles as novel PDE4 inhibitors

4.1. Introduction
4.2. Present Work
4.3. Results and Discussion
4.4. Conclusion
4.5. Experimental
4.6 References
4.7 Appendix

Chapter 5: Pd/C-mediated synthesis of N-indole substituted olanzapine derivatives as PDE4 inhibitors

5.1. Introduction
5.2. Present Work
5.3. Results and Discussion
5.4. Conclusion
5.5. Experimental
