ACKNOWLEDGEMENTS

I avail this opportunity of expressing my deep sense of gratitude to Dr. R.B. Singh, Professor and Head, Department of Genetics and Plant Breeding, Banaras Hindu University, Varanasi; formerly Professor of Agricultural Botany and Dean, Faculty of Agriculture, Institute of Advanced Studies, Meerut University, Meerut, for his most valuable guidance, supervision, keen interest, constant encouragement, constructive criticism and help during the course of investigation and preparation of the manuscript.

I am highly indebted to Dr. K.L. Mehra, Head, Division of Plant Improvement, Indian Grassland and Fodder Research Institute, Jhansi, for granting me leave and valuable advice in course of preparation of this thesis.

I express my sincere thanks to Dr. H.K. Srivastava, Professor of Agricultural Botany and Dean, Faculty of Agriculture, Meerut University, Meerut, and to Dr. Panjab Singh, Agronomist, C.A.Z.R.I., Jodhpur (ex-Lecturer: Agronomy and Farm Incharge, Meerut University, Meerut) for providing laboratory and farm facilities for conducting the experiments.

I am thankful to the Institute of Agricultural Research Statistics, New Delhi, for providing computer facilities for the analysis of the data.
