I wish to express my deep sense of indebtedness and gratitude to my supervising Teacher, Dr. M.A. Ashrof, Reader in Chemistry (Retd.), Maharaja’s College, Ernakulam for his invaluable guidance, motivation and constant encouragement during the entire course of my research work. I am also thankful to the Principal and Head of the Department of Chemistry, Maharaja’s College, Ernakulam for kindly permitting me to carry out the present investigations in the Department of Chemistry and for providing all laboratory and library facilities.

My thankful acknowledgement is due to the university Grants Commission, Govt. of India for the award of a Teacher Fellowship, which enabled me to complete this work. I am also thankful to the Govt. of Kerala for granting me deputation for the study.

I wish to express my sincere thanks to the Heads of Institute for Intensive Research in Basic Sciences (I.I.R.B.S.), Mahatma Gandhi University, Kottayam and Sophisticated Test and Instrumentation Centre (STIC), Cochin University of Science and Technology, for providing facilities for the analytical measurements.

I sincerely acknowledge the help rendered by Dr. I. Ibnusaud, Professor, School of Chemical sciences, Mahatma Gandhi University, Kottayam for carrying out optical activity measurements.

I would also like to acknowledge with gratitude the cooperation and help received from Dr. Sajan Joseph, Senior Research Advisor, Eli Lily & Co., Indiana Polis, U.S.A., for completing the present work.

K.U. Abdel Salam
