5.4 Details of Innovative Learning Practices Used By Teachers in Teaching Population Education
5.5 Details of Innovative Learning Practices Used By Teachers in Teaching Population Education
5.6 Reasons for not implementing Blended Learning Strategy in class rooms
5.7 Analysis of the Awareness of Blended Learning Strategy among the Secondary Level Teachers based on Total Sample
5.8 Awareness of Blended Learning Strategy among the Secondary Level Female and Male Teachers
5.9 Analysis of the awareness of Blended Learning Strategy among the secondary level rural and urban teachers
5.10 Awareness of Blended Learning Strategy among the Secondary Level Teachers of Government School, Government Aided Management School and Private Schools
5.11 Statistical measures of the post-test scores of three Experimental Groups [CAI, FWM, and SM] and Control Group [EM] for the total sample
5.12 Mean, S.D., S. Error and Ranges of Mpop and SDpop of the Post Achievement Test Scores of three Experimental Groups [CAI, FWM, SM] and Control Group [EM] for the total sample
5.13 Results of paired t-test for comparing pre-test and post test achievement scores of each of the Three Experimental Groups [CAI, FWM, SM] and Control Group [EM] For The Total Sample
5.14 Summary of ANOVA of Pre-test and Post test achievement scores of secondary level students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM] for the total sample.

5.15 Results of the summary of Analysis of Co-Variance (ANCOVA) of the pre-test and post test achievement scores of secondary level students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM] for the total sample.

5.16 Results of the adjusted means for the Post test scores of secondary level students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM] for the total sample.

5.17 Results of t-test for comparing the adjusted mean post test achievement scores of CAI and SM for the total sample.

5.18 Results of t-test for comparing the adjusted mean post test achievement scores of FWM and SM for the total sample.

5.19 Results of t-test for comparing the adjusted mean post test achievement scores of SM and EM for the total sample.

5.20 Summary of ANOVA of Pre-test and Post test scores of achievement of girls in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM].

5.21 Analysis of Co-variance (ANCOVA) of Pre-test and Post test achievement scores of girls in.

5.22 Adjusted means for the Post test scores of achievement of girls in the four groups.

5.23 Results of t-test for comparing the adjusted mean post test achievement.
achievement scores of SM and CAI for the sub sample of girls

5.24 Results of t-test for comparing the adjusted mean post test achievement scores of SM and FWM for the sub sample of girls

5.25 Results of t-test for comparing the adjusted mean post test achievement scores of SM and EM for the sub sample of girls

5.26 Summary of ANOVA of the Pre-test and Post test scores of Achievement of Boys in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.27 Analysis of Co-variance (ANCOVA) of the Pre-test and Post test Achievement scores of Boys in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.28 Adjusted means for the Post test Achievement Scores of Boys in the three Experimental Groups [CAI, FWM, and SM] and Control Group [EM]

5.29 Results of t-test for comparing the adjusted mean post test achievement scores of SM and CAI for the sub sample of boys

5.30 Results of t-test for comparing the adjusted mean post test achievement scores of SM and FWM for the sub sample of boys

5.31 Results of t-test for comparing the adjusted mean post test achievement scores of boys in the SM and EM groups

5.32 Results of t-test for comparing the adjusted mean post test achievement scores of SM of boys and girls

5.33 Summary of the ANOVA results of Pre-test and Post test scores of achievement of rural students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]
5.34 Results of Analysis of Co-variance (ANCOVA) of Pre-test and Post test achievement scores of rural students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.35 Adjusted means for Post test achievement scores of rural students in the three Experimental Groups [CAI, FWM, and SM] and Control Group [EM]

5.36 Results of t-test for comparing the adjusted mean post test achievement scores of rural students in the SM and CAI groups

5.37 Results of t-test for comparing the adjusted mean post test achievement scores of rural students in the SM and FWM groups

5.38 Results of t-test for comparing the adjusted mean post test achievement scores of rural students in the SM and EM groups

5.39 Summary of ANOVA results of the Pre-test and Post test achievement scores of urban students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.40 Summary of Analysis of Co-variance (ANCOVA) of Pre-test and Post test achievement scores of urban students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.41 Adjusted means for the Post test scores of urban students in the three Experimental Groups [CAI, FWM, and SM] and Control Group [EM]

5.43 Results of t-test for comparing the adjusted mean post test achievement scores of urban students in the SM and FWM groups
5.44 Results of t-test for comparing the adjusted mean post test achievement scores of urban students in the SM and EM Groups

5.45 Results of t-test for comparing the adjusted mean post test achievement scores of rural and urban students of SM group

5.46 Summary of ANOVA of pre-test and post test achievement scores of pupils in the three Experimental Groups [CAI, FWM, and SM] and Control Group [EM]

5.47 Analysis of Co-variance (ANCOVA) of the pre-test and post test achievement scores of Government school students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.48 Adjusted means for the post test achievement scores of Government school students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.49 Results of t-test for comparing the adjusted mean post test achievement scores of Government school students SM and CAI groups

5.50 Results of t-test for comparing the adjusted mean post test achievement scores of Government school students in the SM and FWM group

5.51 Results of t-test for comparing the adjusted mean post test achievement scores of Government school students in the SM and EM groups

5.52 Summary of ANOVA of Pre-test and Post test
achievement scores of Government Aided Management school students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.53 Analysis of Co-variance (ANCOVA) of the pre-test and Post test achievement scores of Government Aided Management school students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.54 Adjusted means for the Post test achievement scores of Government Aided Management school students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.55 Results of t-test for comparing the adjusted mean post test achievement scores of Government Aided Management school students in the SM and CAI groups

5.56 Results of t-test for comparing the adjusted mean post test achievement scores of Government Aided Management school students in the SM and FWM groups

5.57 Results of t-test for comparing the adjusted mean post test achievement scores of Government Aided Management school students in the SM and EM groups

5.58 Summary of ANOVA of Pre-test and Post test achievement scores of private school students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.59 Summary of ANCOVA of the pre-test and post test achievement scores of private school students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]
5.60 Adjusted means for the Post test achievement scores of private school students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.61 Results of t-test for comparing the adjusted mean post test achievement scores of SM and CAI for the sub sample of private school students

5.62 Results of t-test for comparing the adjusted mean post test achievement scores of SM and FWM for the sub sample of private school students

5.63 Results of t-test for comparing the adjusted mean post test achievement scores of SM and EM for the sub sample of Private school students

5.64 Results of t-test for comparing the adjusted mean post test achievement scores of Government School and Government Aided Management School students in the SM Group

5.65 Results of t-test for comparing the adjusted mean post test achievement scores of Government and Private school students in the SM Group

5.66 Results of t-test for comparing the adjusted mean post test achievement scores of Government Aided Management and Private school students of SM Group

5.67 Statistical Measures of the Post Test Population Awareness Scores of three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.68 Mean, S.D., S. Error, Ranges of Mpop and SDpop of the
Post Test Population Awareness Scores of three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.69 Results of paired t-test for comparing Pre-test and Post test Population Awareness Scores of three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.70 Summary of ANOVA of Pre-test and Post test Population Awareness Scores of students in the three Experimental Groups [CAI, FWM, and SM] and Control Group [EM]

5.71 Analysis of Co-variance (ANCOVA) of the pre-test and Post test Population Awareness Scores of students in the three Experimental Groups [CAI, FWM, SM] and Control Group [EM]

5.72 Adjusted means for the Post test Population Awareness Scores of three Experimental Groups [CAI, FWM, and SM] and Control Group [EM]

5.73 Results of t-test for comparing the adjusted mean post test Population awareness scores of CAI and SM Groups

5.74 Results of t-test for comparing the adjusted mean post test Population awareness scores of FWM and SM Groups

5.75 Results of t-test for comparing the adjusted mean post test Population awareness scores of SM and EM for the total sample

5.76 Ratings of Experts and Teachers on the comparative efficacy of Synthetic Model with that of Existing Method for teaching Population Education at the secondary level in attaining Cognitive dimension of instruction

5.77 Ratings of Experts and Teachers on the comparative
Efficacy of Synthetic Model with that of Existing Method for teaching Population Education at the secondary level in attaining Affective dimension of instruction

5.78 Ratings of Experts and Teachers on the comparative efficacy of Synthetic Model with that of Existing Method for teaching Population Education at the secondary level in attaining psychomotor dimension of Instruction

5.79 Ratings of Experts and Teachers on the comparative efficacy of Synthetic Model with that of Existing Method for teaching Population Education at the secondary level in attaining process skill of instruction

5.80 Ratings of Experts and Teachers on the comparative efficacy of Synthetic Model with that of Existing Method for teaching Population Education at the secondary level in attaining social dimensions of instruction

5.81 Relevance of Synthetic Model for teaching Population Education

5.82 The usability of Synthetic Model for teaching Population Education

5.83 The qualitative aspect of Synthetic Model for teaching Population Education

5.84 General Perceptions about Synthetic Model by Experts and Teachers

5.85 Details of Ratings of teachers regarding the suitability of existing curricular factors for practicing Synthetic Model.
5.86 Details of Analysis of the Availability of Resources, and Extent of Practice of Synthetic Model at the Secondary Level

5.87 The Details of Practical Difficulties Likely To Be Encountered By Teachers While Practicing Synthetic Model at Secondary Level.

5.88 Details of Measures to Be Taken For the Successful Implementation of Synthetic Model in Teaching Population Education at the Secondary Level

5.89 Overall Willingness of Secondary Level Teachers to Implement Synthetic Model for Teaching Population Education

5.90 Item Wise Analysis of Willingness scores of Secondary Level Teachers
