ACKNOWLEDGMENTS

It goes without saying, that a work of this magnitude is never the work of a single individual, but rather the collective effort of many. For this reason, there are a number of groups and individuals that I must acknowledge for their assistance with this undertaking. I would first like to thank my supervisor Dr. Sutapa Mukhopadhyay for providing necessary guidance, valuable suggestions, unfailing encouragement, adding new dimensions to the work and patiently going through all the chapters and making minute corrections.

I would also like to thank Prof. Maloy Mukhopadhyay (H.O.D., Dept. of Geography) for supporting me to complete the field work, along with the other faculty, staff, and students of the Department of Geography. Without their knowledge, guidance, and assistance, this work would have never gotten off of the ground.

Additionally, I would like to acknowledge all of the agencies and individuals in West Bengal and Jharkhand that assisted me with obtaining the data required for this research. These include NATMO, Survey of India, Geological Survey of India, Block offices of Birbhum, Murshidabad, Burdwan district, Waterways and Irrigation Dept of Suri, Kandi along with countless others.

My parents have pushed me to succeed since childhood, and have always been supportive in everything that I have done. Whether good or bad, they have always been there for me, and I sincerely appreciate and thank them for that.

Lastly, but certainly not least, I would like to thank Dr. Swades Pal, Dr. Surojit Let, Krishno Gopal Ghosh, Sunil Saha, Mukul and Suparna Mullick for their fair cooperation in field survey and in finalization procedure of the thesis. This is the absolute best group of friends a person could ever ask for, and I cannot imagine how I would have gotten through any of this without them.
