# Table of Contents

Synopsis  
General Introduction  
List of Abbreviation  

**CHAPTER-1**  
Multicomponent synthesis of 2-(2-hydroxybenzoyl)-6,6-dimethyl-3-phenyl-6,7-dihydro-1H-indol-4(5H)-one via mannich reaction.  
1.1. Introduction  
1.2. Synthesis aspect  
1.3. Biological importance  
1.4. Experimental section  
1.5. Synthetic procedure  
1.6. Single Crystal structure  
1.7. Single crystal Experimental  
1.8. Spectral and physical Characterization  
1.9. Spectral data  
1.10. Conclusion  
1.11 References  

**CHAPTER-2**  
Multicomponent synthesis of 4-phenyl-2-(pyrimidin-2-yl)-1H-chromeno[4,3-d]pyrimidin-5(2H)-one via Biginelli reaction.  
2.1 Introduction of Biginelli reaction  
2.2. Synthesis Aspect  
2.3. Therapeutic importance  
2.4. Current work  
2.5. Experimental section  
2.6. Spectral and physical Characterization  
2.7. Spectral data  
2.8. Conclusion  
2.9. References  

**CHAPTER-3**  
Synthesis and characterization of some 3-(2-(5-phenyl-1H-1,2,3-triazol-1-yl)acetyl)-2H-chromen-2-ones, using Click reaction.  
3.1. Introduction  
3.2. Synthesis Aspect  
3.3. Current Work  
3.4. Reaction scheme  
3.5. Experimental section  
3.6. Spectral and physical Characterization  
3.7. Spectral data  
3.8. Conclusion  
3.9. Reference
CHAPTER-4 Synthesis and characterization of some 2-(tert-butylimino)-3-phenylchromeno[4,3-b][1,4]oxazin-5(2H)-ones, using Multi component Passerini type reactions.

4.1. Introduction 156
4.2. Synthetic Aspects 158
4.3. Biological Significance of 1, 4-Oxazine 165
4.4. Current Work 166
4.5. Reaction Scheme 167
4.6. Experimental 168
4.7. Crystal Structure 171
4.8. Crystal data Collection 171
4.9. Crystal Experimental details 173
4.10. Spectral and physical Characterization 175
4.11 Spectral data 184
4.12 Conclusion 193
4.13 Reference 194

CHAPTER-5 Multicomponent synthesis of 5-amino-6-phenyl-[2,2'-bipyrimidine]-4-carbonitrile.

5.1 Introduction 199
5.2 Synthetic aspect 200
5.3 Synthesis of pyrimidines from amidine derivatives 203
5.4 Therapeutic importance 209
5.5 Experimental process 213
5.6 Spectral and physical Characterization 217
5.7 Spectral data 230
5.8 Conclusion 243
5.9 Reference 244

CHAPTER-6 Biological evaluation of synthesized chemical entities.

6.1 Introduction of Anti-inflammatory activity 249
6.2 Result and discussion of anti-inflammatory 253
6.3 In vitro Characterization of Anti-Mycobacterial Activity 255
6.4 Result and discussion of antitubercular 261
6.5 Anti-cancer activity 261
6.6 Result and Discussion of Anti-cancer activity : 266
6.7 Reference 267
