ACKNOWLEDGEMENT

I thank the Almighty for giving me the strength and patience to work through all these years so that today I can stand proud with my head held high.

I would like to start with the person who made the biggest difference in my life, my Research guide, Dr. K. Sathiyamurthy, Assistant Professor, Department of Bio-Medical Science, School of Basic Medical Sciences, Bharathidasan University, Tiruchirappalli, Tamil Nadu, India. He has been a living role model to me, taking up new challenges every day, tackling them with all his grit and determination and always thriving to come out victorious. During my initial days with the group, I was apprehensive about my decision to join an alien field, where things were new to me. Dr. Sathiyamurthy came to my rescue with his intelligent ideas, thought provoking discussions and comprehensive understanding to help me sail through the initial fumbling. His attitude of living every moment as it comes, making serendipitous observation and converting them to new possibilities, correlating ideas and understanding the obvious has helped me come a long way and will always guide me in future. I will never find words to tell what I owe to him, and if I start doing it, I would not know where to stop…thanks for everything Sir…to me, professionally, you are “perfection personified”.

My special words of thanks should also go to my doctoral research committee members, Prof. Dr. N. Rajendran and Prof. Dr. N. Rajam for always being so kind, helpful and motivating. Their constant guidance, cooperation and support has always kept me going ahead.
