ACKNOWLEDGEMENTS

This is an excellent opportunity for me to express my profound debt to my venerable teacher, Professor G.K. Manna, D. Phil., P.R.S., D.Sc., F.N.A.Sc., F.A.Z., F.N.A., Professor of Zoology, University of Kalyani, whose incredible ingenuity sparked deep passion in me to undertake cytogenetical research. He not only suggested the problem but also rendered constant guidance throughout the course of investigation.

I should like to record my deepest gratitude to my reverend teacher, Professor A.K. Bose, Department of Zoology, whose invaluable suggestion and counsel made me inspired to accomplish such arduous task. I must gratefully acknowledge the useful contribution of Professor M. Gupta, Dept. of Statistics, in solving many statistical problems enthusiastically. My grateful debt is to Dr. D.P. Halder, Head of the Department of Zoology, K.U., Dr. M. Das, Scientist, CICFRI, Barrackpore and Mr. A. M. Biswas, Headmaster, Pannalal Institution, Kalyani for their great help and co-operation on diverse occasions.

I should eulogize my laboratory colleagues for their help in bringing out the thesis in its presentable shape. My special thanks go to Mr. B. N. Sanyal and B. Sanyal too.

Last but not the least, I should owe my wife who, besides enduring constraint of domestic needs, encouraged me and rendered useful assistance.

Dated Kalyani,
8th October, 1991.
