Acknowledgement

It is my great pleasure to acknowledge my research supervisors Dr. Debabrata Mandal and Dr. Naznin Ara Begum who introduced me to a fascinating realm of chemistry. Their invaluable guidance, constant inspiration, unending support and constructive criticism helped me a lot to focus my views in proper perspective. I am grateful to them for giving me a liberty to carry out my research work throughout the course of this programme. My deepest personal regards are due for them forever.

I am thankful to all the faculty members of the Department of Chemistry, University of Calcutta and Visva-Bharati University.

It is my pleasure to acknowledge Dr. Sobhan Sen, School of Physical Sciences, Jawaharlal Nehru University, New Delhi for giving me the opportunity to work in Femtosecond fluorescence upconversion instrument.

I am very much thankful to my lab-mates Saswati, Samiran, Manika, Nabaruna, Madhusree, Partha, Biswajit, Nayan, Rajibul da, Sreeparna, Sk Batuta, Niharul, Abhijit, Tamanna for their helpful hand, sympathetic ears and making the lab feel like a family.

I must give special thank to Deborin for always being present beside me and also Giyasuddin for lab work.

I express sincere and warm regards to all my teachers in school, college and university. Their excellent teaching enriched my knowledge and their motivation made me to believe on myself.

It gives me great pleasure to thank my old friend Dr. Md Hedayetullah Mir from whom I have received unfailing support and encouragement during many years of studies. I am also thankful to Yousuf, Aniruddha, Soumen, Piali, and for their help and cooperation during my research work. Arghyadeep, Sanchari, Tanmay, Rajib, Moumita, Leena, Yeasin, Subhasis, Isani, Khairul, Anisur, Amitava, Bikash and all my other friends have been special to me throughout these years.

I acknowledge University Grant Commission (UGC), India, for granting me the Maulana Azad National fellowship for Ph.D. and the Department of Chemistry of University of Calcutta
for providing me all the experimental facilities for my research work, namely the UV-VIS spectrophotometer, spectrofluorimeter, time-correlated single photon counting setup (TCSPC), etc. I feel very content in doing Ph.D. in this department. I also gratefully acknowledge the Council of Scientific & Industrial Research (CSIR), India (Project No. 01(2390)/10/EMR-II) and DST, India (Project No. SR/SO/BB-0007/2011), for financial support.

My acknowledgement would be incomplete without thanking the biggest source of my strength, My Family. Whatever I am and whatever I intend to be in future is because of their goodwill and unstinted support. Their kind cooperation helped me in pursuing the Ph. D. And no words are enough to acknowledge them. I am absolutely delighted and overweening to acknowledge my father, mother, Sisters and my daughter Rummana. Most importantly I would like to thank my wife for her support, encouragement, and understanding which allowed me to spend more time in my Research work. Her unwavering and unselfish love made my imperfections seem perfect and all my shortcomings appear complete.

I have also been assisted and supported by many people over the years to whom I would like to express my heartfelt gratitude. My gratitude to all those people also, whose names I might have omitted unwillingly.

(GIASUDDIN AHAMED)
Department of Chemistry
University of Calcutta
