I express my heartfelt gratitude to my supervisor, Dr. Samir Kumar Mukherjee, Reader, Department of Microbiology, University of Kalyani, for his esteemed supervision, incessant support, and constructive criticism throughout my research work. He has truly been a great source of inspiration, insight, input and caring gesture. The knowledge he has imparted and the patience he has displayed were vital for completing this study.

I owe a depth of gratitude to Dr. Keka Sarker, Lecturer, Department of Microbiology, University of Kalyani, for her valuable suggestion and constant encouragement during the course of my work.

I am like to thank my senior labmates Dr. Sanjay Guha Roy, Dr. Sangram Sinha and Suchismita Chakraborty for their overgenerous help and co-operation through out my research work.

A special thanks to my friends Arghya, Bandhan, and Anirudha for providing a favorable environment in the laboratory.

This acknowledgement would be incomplete without my special mention about one fabulous people, my friend, Swagata for her continuous encouragement, advice and friendliness. Memories of our friendship will be cherished by me, forever.

I am also grateful to Dr. Alok Samal, Department of Environmental Science, for his help in AAS technique towards the end of this piece of work.

Also I thank Pulokesh Aich, Subrata Panja, Swati De and Arijit for their help, advice and co-operation.

I acknowledge the financial support received from University of Kalyani.

I like to extend my heartfelt thanks to all students and staff members of the Department of Microbiology.

Finally, I would also express my deep sense of gratitude to my parents and family members, my elder brother in particular, for their encouragement and all sort of support throughout, which has always inspired me.
