CONTENTS

CHAPTER - I : INTRODUCTION

1.1 General Introduction 1
1.1.1 Cognitive ability and children 2
1.1.2 Motor creativity and children 5
1.1.3 Kinesthetic sense and children 7
1.1.4 Relation of cognitive ability, motor creativity and kinesthetic sense 16
1.1.5 Child development and exercise 17
1.2 Statement of the Problem 22
1.3 Purpose of the Study 22
1.4 Delimitation of the Study 22
1.5 Limitation of the Study 23
1.6 Hypotheses 24
1.7 Significance of the Study 24
1.8 Definition of Terms 25

CHAPTER - II : REVIEW OF RELATED LITERATURE

2.1 Review of Literature Related with Cognitive ability 27
2.2 Review of Literature Related with Motor Creativity 37
CHAPTER-II : REVIEW OF RELATED LITERATURE

2.3 Review of Literature Related with Kinesthetic Sense

2.4 Review of Literature Related with Chronic Exercises

CHAPTER-III : METHODOLOGY

3.1 The Subjects

3.2 Criterion Measure

3.3 Instrument and Tools used

3.4 Reliability of Data

3.5 Procedure for Collecting Data

3.5.1 Physical measurements

3.5.1.a Height

3.5.1.b Weight

3.5.2 Cognitive ability tests

3.5.2.a Raven's Progressive Matrices (RPMT) Test

3.5.2.b Wisconsin Card Sort Test- Manual adaptation (WCST)

3.5.2.c Academic Performance test

3.5.3 Motor creativity test

3.5.4 Kinesthetic sense test

3.6 Experimental Design

3.7 Treatment Protocol

3.8 Procedure for Data Analysis
CHAPTER-IV : RESULT AND DISCUSSION

4 Presentation of Data 67

4.1 Physical parameters 67

4.1.1 Height 68

4.1.2 Weight 69

4.2 Age specific performance parameters of the subjects 70

4.2.1 Cognitive ability 70

4.2.1.1 Cognitive ability measured by Raven’s Progressive Matrices Test (RPMT) 70

4.2.1.2 Cognitive ability measured by Wisconsin Card Sort Test (WCST) 71

4.2.1.3 Cognitive ability measured by Academic Performance Test (APT) 72

4.2.2 Motor creativity 73

4.2.3 Kinesthetic sense 74

4.3 Physical parameters of experimental and control groups 75

4.3.1 Height of experimental and control groups 75

4.3.2 Weight of experimental and control groups 77

4.4 Effect of chronic exercises on children 78

4.4.1 Cognitive ability 78

4.4.1.1 Cognitive ability measured by RPMT of experimental Groups 78

4.4.1.2 Cognitive ability measured by WCST of experimental groups 79

4.4.1.3 Cognitive ability measured by APT of experimental groups 81

4.4.1.4 Cognitive ability measured by RPMT of control groups 82

4.4.1.5 Cognitive ability measured by WCST of control groups 82

4.4.1.6 Cognitive ability measured by APT of control groups 83

4.4.1.7 Discussion of cognitive ability 85

4.4.2 Motor creativity 85

4.4.2.1 Motor creativity of experimental groups 85
CHAPTER-IV : RESULT AND DISCUSSION

4.4.2.2 Motor creativity of control groups 87
4.4.2.3 Discussion of motor creativity 88
4.4.3 Kinesthetic sense 88
4.4.3.1 Kinesthetic sense of experimental groups 89
4.4.3.2 Kinesthetic sense of control groups 90
4.4.3.3 Discussion of kinesthetic sense 91

4.5 Relationship of different parameters of different age groups 92
4.5.1 Relationship among different parameters of 6 years age group 92
4.5.2 Relationship among different parameters of 7 years age group 93
4.5.3 Relationship among different parameters of 8 years age group 94
4.5.4 Discussion of relationship of different parameters 94

4.6 An overview 95

CHAPTER-V : SUMMARY, CONCLUSION & RECOMMENDATION

5.1 Summary 97
5.2 Conclusion 102
5.2.1 Physical Parameters 102
5.2.2 Cognitive Ability 103
5.2.3 Motor Creativity 103
5.2.4 Kinesthetic Sense 103
5.2.5 Relationship of cognitive ability, motor creativity & kinesthetic sense 104

5.3 Recommendation 105
5.3.1 Recommendation for future investigation 105
5.3.2 Recommendation for Practical Application 106

BIBLIOGRAPHY

A. Books 107
B. Journals & Periodicals 110
C. Dictionary 116
