I wish to extend my warmest thanks to the entire Research scholar, Department of Environmental Biotechnology, who have supported and timely helped during my difficult moments.

I would like to thank all the seniors and juniors who have helped and inspired me during my doctoral study.

The financial support of the Bharathidasan University Research Fellowship is gratefully acknowledged.

I am very much thankful to my truly friends R. Menaka, K. Kalpana, A. Vasanthavally and A. Balasaraswathy for their understanding and moral support during these years for finishing my thesis.

My sincere thanks to S.N. Scientific company Pvt Ltd., Tiruchirappalli for the guidance and support for construction the reactor.

I offer my regards and blessings to all of those who supported me in any respect during the completion of the project, as well as expressing my apology that I could not mention personally one by one.
This Ph.D., dissertation is a fulfillment of my father’s lifelong dream and would not have been possible without him and my mother’s dedication and hard work. My sisters gave me the courage and determination to meet any challenge that came my way. When the going got tough, my family, especially my brother in laws provided me the strength to go on. My mother in law and father in law were always there to cheer me up. And most importantly, this adventure would not have met with success without the loving support, patience, understanding and help from my husband. Thus, this accomplishment is my tribute to them!

Last but not least, thanks be to god for my life through all tests in the past five years. You have made my life more bountiful. May your name be exalted, honored and glorified.
