Acknowledgement

Foremost, I thank Shree Kali Mata for endowing me with health, patience, and knowledge to complete this work.

First, I would like to express my sincere gratitude to my supervisor Prof. (Dr.) Chiranjib Bhattacharjee (Professor; Chemical Engineering, Jadavpur University) for the continuous support of my Ph. D study and research, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my Ph. D study. One simply could not wish for a better or friendlier supervisor. The most important thing we learn or try to learn over our life is how to think in simpler ways, beside the basic biology, and mathematics. I adopted this process from my advisor Prof. (Dr.) Ranjana Chowdhury (Professor; Chemical Engineering, Jadavpur University). I was amazed to watch her think from the very basic and sort out complicated issues in very logical ways. Her dynamic attitude, positive thinking, problem solving attitude boost me to sustain in very crucial time. Both of them are truly workaholic in nature. I feel fortunate that they gave me opportunity to carry out research under their guidance, and supervision in spite of their busy schedule. I would like to express my gratitude to them.

I also thankful to Dr. (Prof.) S. Murugesan, in Pharmaceutical Chemistry department of Birla Institute of Technology and Science, Pilani, Rajasthan for his unconditional help, and guidance of basic pharmacology. I receive the great opportunity to work with Scientist (Dr.) E. Padmanabhan, Indian Institute of Chemical Biology, Kolkata and Prof. (Dr.) T.K. Pal, Bio-equivalence study center, Department of Pharmaceutical Technology, Jadavpur University, I really thankful for their great support during their busy schedule. If I not mention name of Prof.
(Dr.) P. Rajamani, professor of Electrical and Electronics Engineering of Einstein College of Engineering, Tirunelveli, Tamilnadu, it should be incomplete. Really I am gratified for his help, and support.

Here I would like to thank my friends and lab mates for being my comfort zone. I could resolve various so called trivial issues by discussing with them. Thank you very much. You have been fabulous.

Finally I thank my family members, without their blessing I could not have completed this PhD course.
