Acknowledgement
I would like to express my deep and sincere gratitude to my Research Supervisor, Professor R. Udhayakumar, Professor of Agricultural Engineering, Faculty of Agriculture and Animal Husbandry, Gandhigram Rural Institute (Deemed University), Gandhigram, Tamilnadu. His wide knowledge and logical way of thinking have been of great value for me. His understanding, encouraging and personal guidance have provided a good basis for the present thesis.

I am deeply grateful to my joint Research Supervisor, Professor P. Mambani, Professor and Head, Dept, of Soil and Environmental Management, National University of Rwanda, Rwanda and Expert in my Doctoral Committee Professor M. Sankaranarayanan, Professor and Dean, Faculty of Agricultural Engineering and Environmental Sciences, Higher Institute of Agriculture and Animal husbandry, ISAE, Rwanda for their detailed and constructive comments, and for their important support throughout this work.

I owe my most sincere gratitude to Prof. Kalisa Mbanda, former Rector and Prof. Dr. Juvenal Nshimimana former Vice-Rector in charge of Academic Affairs, ISAE who gave me the opportunity to pursue my higher studies in GRI. I wish to extend most sincere thanks and deep sense of obligations to Dr. Charles Karemangingo, Rector, ISAE for granting research fund to carry out this study.

I warmly thank Prof. Dr.T. Senthivel, Dean, Faculty of Agriculture and Animal Husbandry, Gandhigram Rural Institute (Deemed University), Gandhigram for his encouragement and support through out this work.

My w arm thanks are due to Mr. Claude Nayaho, Agronomist, ISAE for his cooperation and useful input through out my research work.

All support is gratefully acknowledged, including all of my family members, friends and colleagues at Higher Institute of Agriculture and Animal husbandry, ISAE, Rwanda. Their love and prayers were the foundation of support throughout the entirety of my PhD studies.
