ACKNOWLEDGEMENTS

Many people helped me in numerous ways to make this thesis possible. I would like to thank them all and to mention some of the ways I received support over the last five years.

I am deeply grateful to my supervisors, Professor Imrana Qadeer and Professor K. R. Nayar for their encouragement, constructive ideas and support. My Special and sincere thanks, however, goes to Professor Imrana Qadeer, my main supervisor for mentoring support, valuable guidance and encouragement throughout the period of my study, without which it would not have been possible to complete such an exhaustive and tiring work. Her critical perspective on the research has been insightful and challenging. I would like to extend my grateful to Professor Ghanshyam Shah who also supervised my research work for initial two years. I also thank other teaching faculties of the Centre of Social Medicine and Community Health for their integrative type of teaching that provided me an opportunity for developing my understanding in social, cultural, economic and political dimensions of health and illness. My heartfelt gratitude goes to the staffs of Documentation Centre of Social Medicine and Community Health, Library of Jawaharlal Nehru University and National Medical Library, New Delhi.

I wish to express my sincere gratitude to my local guide, Professor Jeevan Bahadur Sherchand, Institute of Medicine, Tribhuvan University and Executive Director of Infectious and Tropical Diseases Research and Prevention Centre (ITDRC), Kathmandu for his immense practical help and guidance in my field study in Nepal. I extend my thanks to the Campus Chief of Mahendra Ratna Campus and Tribhuvan University, Kathmandu for giving me an opportunity to undertake my Ph. D in Jawaharlal Nehru University, New Delhi.

My sincere gratitude is extended to Professor Peter J. Brown and Dr. Marcia C. Inhorn, Emory University at Atlanta Georgia, Merrill Singer, Medical Anthropologist at Hispanic Health Council in Hartford US and Professor Nick Higginbotham, University of Newcastle, Australia for providing me their invaluable books and published materials on medical anthropology and health social sciences free of cost.

I am also indebted to the staffs of the SHP facilities of the Jhalari VDC of Kanchanpur and the Mahadevsthan VDC of Kavre district for assisting me in managing malarial patients identified in survey and giving proper advices. I would like to thank the
Vector Control Assistants and the Senior Public Health Officers of Kanchanpur and Kavre Districts for their help in conducting fieldworks and providing me district level data on malaria. I am grateful to Dr. Manas Kumar. Banerjee and other staffs of Epidemiology and Disease Control Division, the Ministry of Health for their kind help and encouragement.

My heartfelt thanks go to the villagers and the leaders of the study areas of the Kanchanpur and Kavre Districts for their time and co-operation through out my fieldwork. In particular, I like to thank household heads and their family members of Kasaroul, Banjaria, Kalapani, Beldandi of the Jhalari VDC and Dhaitar, Judigaun, Pouwa, Gahate of the Mahadevsthan VDC for their patience and willingness to participate in the fever survey, interviews and focus group discussions. I am specially indebted to Dal Bahadur Karki, Shivalal Rana, Raj Bhai Chaudhari-Tharu and their family members, Ganesh Bhandari, Ms. Basanti Bhandari and Mr. Hari Eir of the Jhalari VDC, and Ram Prasad Sapkota, Nabin Sapkota, Ms. Kalpana Poudel, Krishna Chandra Bogati and Thulakancha (Ram Prasad) of the Mahadevsthan VDC, who generously gave me a space to stay at their home and facilitated me to collect data even in difficult situations arising from political conflicts. I am grateful for their friendship and brotherhoods.

I would like to extend my thanks to my fellow students/friends in particular Bikash KC., Lekhanath Bhattari, Hari Roka, Sher Rana, Bidhan Gole, Samar Sinha, and Yogendra Shahi for various help and encouragement. I would like to express my heartfelt gratitude to Mr. Chinmoy Biswal and Mr. Lal Rapacha for their kind assistances in editing the draft of my thesis despite tight schedules in their own PhD research works.

I would like to acknowledge the financial support from UNDP/World Bank/WHO Special Programme for Research and Training in Tropical Diseases of the World Health Organization for the entire period of the study in Jawaharlal Nehru University, New Delhi.

Finally, I would like to thank my family: my wife, Dhana Thapa- Budhathoki for her encouragement, social and emotional support, and taking care of our family in my absence; my mother for her care and blessings; my daughters, Sophie and Ruchie for missing my close parental care for quite a long time.
