## LIST OF TABLES AND FIGURES

### CHAPTER ONE

<table>
<thead>
<tr>
<th>Table</th>
<th>Description</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>Situation of Malaria in Nepal (1963 to 2003)</td>
<td>28</td>
</tr>
<tr>
<td>1.2</td>
<td>Malaria Situations in five Development Regions of Nepal for the last five years</td>
<td>31</td>
</tr>
<tr>
<td>1.3</td>
<td>Malaria Situation in different Ecological Regions of Nepal</td>
<td>32</td>
</tr>
<tr>
<td>1.4</td>
<td>Trend of Malaria situation in two Districts for 10 Years of Period</td>
<td>36</td>
</tr>
<tr>
<td>1.1</td>
<td>Global Distribution of Malaria Transmission risk in 2003</td>
<td>14</td>
</tr>
<tr>
<td>1.2</td>
<td>Estimated Incidence of Clinical Malaria Episodes resulting from local</td>
<td>15</td>
</tr>
<tr>
<td>1.3</td>
<td>Geographical Location of Nepal</td>
<td>20</td>
</tr>
<tr>
<td>1.4</td>
<td>Map of Nepal showing Ecological Zones, Development Regions and Districts</td>
<td>21</td>
</tr>
<tr>
<td>1.5</td>
<td>Transect of Nepal (Landscape)</td>
<td>25</td>
</tr>
<tr>
<td>1.6</td>
<td>Stratification of Malarious Areas of Nepal</td>
<td>26</td>
</tr>
<tr>
<td>1.7</td>
<td>Malaria Situation in the Hill and Terai Belts of CDR and FWDR</td>
<td>33</td>
</tr>
<tr>
<td>1.8</td>
<td>Organogram of Ministry of Health</td>
<td>43</td>
</tr>
</tbody>
</table>

### CHAPTER THREE

<table>
<thead>
<tr>
<th>Table</th>
<th>Description</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1</td>
<td>Summary of Sampling Procedure and Sample Size</td>
<td>110</td>
</tr>
<tr>
<td>3.2</td>
<td>Distribution of Sample Households by Occupations and Landholding Sizes</td>
<td>120</td>
</tr>
<tr>
<td>3.3</td>
<td>Distribution of Sample Households by Economic Class in four Villages</td>
<td>121</td>
</tr>
</tbody>
</table>

### CHAPTER FOUR

<table>
<thead>
<tr>
<th>Table</th>
<th>Description</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1</td>
<td>Distribution of Study Villages and Households with some Population Characteristics</td>
<td>141</td>
</tr>
<tr>
<td>4.2</td>
<td>Distribution of the Populations by Sex and Age groups</td>
<td>142</td>
</tr>
<tr>
<td>4.3</td>
<td>Distribution of Households by Caste and Ethnic Groups in the Terai</td>
<td>144</td>
</tr>
<tr>
<td>4.4</td>
<td>Distribution of Households by Caste and Ethnic Groups in the Hill.</td>
<td>144</td>
</tr>
</tbody>
</table>
Table 4.6: Distribution of Sample Households by Caste/Ethnicity and Economic Strata ................................................................. 146
Table 4.7: Distribution of Types of Households by Castes and Economic Classes ............................................................................. 147
Table 4.8: Literacy and Education Status of Populations in the study villages. 149
Table 4.9: Literacy Status by Caste/Ethnicity and Economic Classes ........150
Table 4.10: Educational Status by Caste/Ethnicity and Economic Strata ....151
Table 4.11: Distribution of Households by Religions in the Terai and Hill ......154
Table 4.12: Distribution of Households by Size of Landholding ............... 162
Table 4.13: Distribution of Sample Households by Landholding and Economic Strata ........................................................................... 163
Table 4.14: Distribution of the Populations by Primary and Secondary Occupations in the Terai and Hill Regions ........................................... 165
Table 4.15: Distributions of the Sample Households by Family Occupations and landholding size ................................................................. 167
Table 4.16: Distributions of Respondents by their Family Occupations and Economic Classes ................................................................. 169
Table 4.17: Distribution of Households by Annual Family Income .............. 170
Table 4.18: Distribution of Households by Economic Strata and Villages ..... 171
Table 4.19: Distribution of Households by the Time Period of In-migration and Economic Strata ............................................................................. 178
Table 4.20: Distribution of Households by the Level of Food Sufficiency ..... 183
Table 4.21: Level of Food Sufficiency across Different Economic Classes ..... 183
Table 4.22: Level of Food Sufficiency across Different Caste and Ethnic Groups ......................................................................................... 184
Figure 4.1: Organisation Chart of District Health Services of Kanchanpur ...... 132
Figure 4.2: Organisation Chart of District Health Services of Kavre ............. 133

CHAPTER FIVE

Table 5.1: Occurrence of Fever in the Study Villages for Six Months from May to October 2003 ...................................................................... 193
Table 5.2: Distribution of Fever Cases by Age group and Sex in the Terai and Hill ......................................................................................... 194
Table 5.3: Distribution of Fever Cases across different Economic Strata
of Terai and Hill Village ............................................................... 196
Table 5.4: Distribution of Fever Cases across Different Castes and Classes ....196
Table 5.5: Occurrence of Febrile illness among Difference Economic Strata
of Hill and Terai ................................................................. 198
Table 5.6: Occurrence of Malaria in the Study Villages for 6 months (May to
September 2003) ................................................................. 199
Table 5.7: Episode Analysis of Malaria Cases in terms of
Occurrence of Fever .............................................................. 200
Table 5.8: Distribution of Malaria Cases and Occurrence rate across
Different Age Groups ........................................................... 203
Table 5.9: Occurrence of Malaria across different Classes of Terai and Hill ...205
Table 5.10: The Occurrence of Malaria across Different Castes and Classes.... 206
Table 5.11: Association between Environmental Factors and Occurrence of
Malaria ............................................................................. 208
Table 5.12: Rainfall, Temperature and Occurrence of Malaria
for 12 months in 2003 ............................................................. 210
Table 5.13: Monthly Distribution of Malaria Cases and Malaria
Occurrence Rates ............................................................... 212
Figure 5.1: Monthly Distribution of Malaria Cases in Jhalari and
Mahadevstha VDCS ............................................................. 211

CHAPTER SIX

Table 6.1: Percentage Distribution of Perceived Problem of Illnesses across
Economic Strata in the study areas ........................................... 219
Table 6.2: Distribution of Perceived Causes of Illnesses by Economic Strata in the
Study Areas ......................................................................... 222
Table 6.3: Characteristics of Five Types of Routine Fever ...................... 228
Table 6.4: Distribution of Respondents knowledge about Symptoms by
Economic Strata in the Study Areas ........................................... 238
Table 6.5: Respondents Knowledge about Symptoms by Economic Status and
Caste/ethnic Background ....................................................... 239
Table 6.6: Distribution of Respondents by their Perceived Causes of Malaria by
Economic Classes of Hill and Terai Villages ............................. 241
Table 6.7: Distribution of Respondents’ Perceived Cause of Malaria by Castes and Economic Classes ................................................................. 242
Table 6.8: Distribution of the Respondents’ Knowledge about Transmission of Malaria by Economic Strata ................................................................. 248
Table 6.9: Distribution of the Respondents’ Knowledge about Transmission of Malaria by Caste/Ethnicity and Economic Class ........................................... 250
Table 6.10: Educational Status of the Respondents and their Knowledge about Malaria Causation and Transmission ..................................................... 252
Table 6.11: Distribution of the Respondents by Perceived Risk of Malaria in the Study Villages .................................................................................. 253
Table 6.12: Distribution of Perceived Risk of Malaria across Different Classes .............................................................................................. 254
Table 6.13: Distribution of the Respondent’s Perceived Severity of Malaria Fever by Economic Strata in the Study Areas .................................................. 257

CHAPTER SEVEN

Table 7.1: Use of Different Sources of Treatment for Fever and Malaria across Different Classes of Hill and Terai ......................................................... 272
Table 7.2: Use of Home Remedy in Fever across Castes and Classes of Hill and Terai .............................................................................................. 274
Table 7.3: Use of Antipyretics for Self-Treatment in Fever across Castes and Classes .............................................................................................. 275
Table 7.4: Use of the Traditional Healers in Fever across Castes and Classes .............................................................................................. 278
Table 7.5: Use of SHP facility in Febrile Illness across Castes and Classes .............................................................................................. 280
Table 7.6: Use of the Drug Retailers in Fever across Castes and Classes .............................................................................................. 283
Table 7.7: Use of Hospitals in Fever across Different Economic Strata .............................................................................................. 284
Table 7.8: Use of Biomedical and Traditional Sources of Treatment/Healing across Different Classes of the Terai and Hill ........................................ 287
Table 7.9: Choices of Sources of Treatment in Fever and Malaria Cases made by Peoples Jhalari and Mahadevsthan .................................................. 288
Table 7.10: Choices of Sources of Treatment for fever across Different Classes .............................................................................................. 290
Table 7.11: Choices of Sources of Treatment for malaria across Different Classes .............................................................................................. 291
Table 7.12: First Choices of Sources of Treatment for malaria across Castes and Classes ................................................................. 292
Table 7.13: Second Choices of Sources of Treatment for Malaria across Castes and Classes .............................................................................. 293
Table 7.14: Gender and Treatment seeking for malaria in the Hill and Terai .. 301
Table 7.15: Perceived Severity and Time Delay in Seeking Medical Treatment in Jhalaria and Mahadevsthan ............................................................... 304
Table 7.16: Initial Choice of Treatment by Episodes of Fever and Perceived Malaria ........................................................................................................ 305
Table 7.17: Use of the Sources of Treatment by Location of Villages ........... 307
Table 7.18: Distribution of Use of Sources of Treatment for Fever/Malaria by Location of Villages and Economic Strata in the Terai ................................. 308
Table 7.19: Distribution of Use of the Sources of Treatment for fever by the location of Villages and Economic Strata in the hill (Mahadevsthan) ........ 309
Table 7.20: Waiting and Delay in Treatment Seeking for Fever in Jhalari and Mahadevsthan ......................................................................................................... 311
Table 7.21: Time Delay in Seeking Medical Treatment Outside Home for fever by Location of Villages and Economic Strata ......................................................... 312
Table 7.22: Time Delay in Seeking Biomedical Treatment by Caste and Class and Location of the Study Villages of Jhalari (Terai) ........................................ 313
Table 7.23: Time Delay in Seeking Treatment by Caste and Class and Location of the study Villages of Mahadevsthan (Hill) .................................................. 314
Table 7.24: Distribution of Treatment Compliance by Economic Strata in the Terai and the Hill villages ........................................................................................................ 316
Table 7.25: Working Day Lost due to the malaria fever in the Study Areas ..... 318
Table 7.26: Distribution of Felt Needs for Proper Diagnosis by Economic Status ................................................................................................................................. 321
Table 7.27: Perceived Quality of the Public Health Facility (SHP) and satisfactions towards it ................................................................................................................................. 332
Table 7.28: Respondents' Satisfaction towards Drug Retailers and Reasons for using them ................................................................................................................................. 334
CHAPTER NINE

Table 8.1: Distribution of Respondents’ Perceptions about the Possibility of Prevention of Malaria by the Socioeconomic Strata ........................................ 340
Table 8.2: Respondents’ Perceptions about the Possibility of Prevention of Malaria by Castes and Classes ....................................................... 340
Table 8.3: Distribution of Respondents’ Knowledge of Methods of Malaria Control/Prevention by Economic Strata ........................................ 342
Table 8.4: Respondents’ Knowledge about Prevention/Control of Malaria by Economic Strata and Caste/Ethnicity ........................................... 343
Table 8.5: Distribution of Respondents’ Knowledge of Sources of Mosquito Breeding by the Economic Strata ............................................. 346
Table 8.6: Distribution of Respondents’ Knowledge about methods of Mosquito Control by Economic Strata ................................................. 348
Table 8.7: Distribution of the Respondents’ Knowledge about the Controlling Density of Mosquitoes .............................................................. 349
Table 8.8: Use of Preventive Methods against Mosquito and Economic Status of Households ........................................................................ 351
Table 8.9: Distribution of Households by Use of Bednets and Economic Classes ............................................................................................ 353
Table 8.10: Use of Bednets across Castes and Classes in the Terai and Hill villages ......................................................................................... 353
Table 8.11: Initial Use of Bednets in Households by Economic Classes ...... 354
Table 8.12: Distributions of Households by Ownership of Number of Bednets across Different Economic Classes ............................................ 357
Table 8.13: Distribution of Reported Condition of Bednets by Classes ........ 358
Table 8.14: Distribution of Reported Condition of Bednets across Castes and Classes ..................................................................................... 359
Table 8.15: Proper Use of Bednets across Different Castes and Economic Classes ......................................................................................... 360
Table 8.15: Perceived Efficacies of Bednets across Different Economic Strata ................................................................................................. 362
Table 8.16: Distribution of Respondents by their Perceived Efficacy of Bednets and Caste/Ethnic Background ......................................................... 363
Table 8.17: Reasons for not using or not Properly Using Bednets .......... 364
Table 8.18: Knowledge and Use of Traditional methods across Different Classes ................................................................. 367
Table 8.19: Association between Use of Bednets and Occurrence of Malaria in the Study Villages ......................................................... 369
Table: 8.20: Reasons for accepting Insecticide Spray in the Study Areas ...... 372
Table 8.21: Distribution of Respondents' Attitude towards Insecticide spraying by Economic Strata .............................................................. 374
Table 8.22: Distribution of Respondents' Attitude towards Insecticide Spraying by Caste and Class ................................................................. 375
Table: 8.23 Correlation between Preventive Practices and Knowledge/ Perceptions about malaria ................................................................. 381
Table 8.24: Distribution of the Respondents by Duration of Bednet-use and Economic Classes in Hill and Terai ......................................................... 383
