### INTRODUCTION

- Anatomy and Physiology of Colon 1-3
- Barriers to Colonic Drug Absorption 3-4
- Factors Governing Colonic Drug Delivery 4-6
- Colonic Absorption 6-9
- Drug Candidates for Colon Delivery 9-10
- Approaches for Colonic Drug Delivery 11
- Irritable Bowel Syndrome 12-18
- Colon-Specific Drug Delivery Systems 19-24
- Single Unit V/S Multiparticulate Dosage Forms 24
- The Microsponge Delivery System 25-27

### LITERATURE SURVEY

26-34

### DRUG PROFILE

35-39

- Dicyclomine 35-36
- Paracetamol 37-39

### RESEARCH ENVISAGED & PLAN OF WORK

40-41

### EXPERIMENTAL WORK

42-125
- **Preformulation Studies** 42-64
  - Drug identification tests 42-45
  - Calibration curves 46-57
  - Determination of solubility 58
  - Drug-excipients compatibility studies 58-62

- **Preparation and Characterization of Microsponge Formulations** 65-89
  - Preparation of microsponges 65-66
  - Optimization of formulations 66-69
  - Characterization of microsponges 69-85

- **In-vitro Drug Release Studies of Microsponge Formulations** 90-109
  - In-vitro drug release studies 90
  - Kinetics of release 90

- **Preparation and characterization of Colon-Specific Formulations** 110-115
  - Preparation of colon specific tablet formulations 110-111
  - Evaluation of core and coated tablets 112-114

- **In-vitro Drug Release and Stabilities Studies of Colon Specific Formulations** 116-125
  - In-vitro drug release studies of colon specific formulations 116-122
  - Stability Studies 123-124

**SUMMARY** 126-135

**BIBLIOGRAPHY** 136-146

**APPENDIX**
