CONTENTS

CHAPTER 1: INTRODUCTION TO PHOSPHOLIPIDS

1.1 DEFINITION AND CLASSIFICATION OF LIPIDS 1
   1.1.1 Simple lipids 2
   1.1.2 Complex lipids 3

1.2 NOMENCLATURE OF PHOSPHOLIPIDS 6

1.3 SOURCES OF PHOSPHOLIPIDS 7
   1.3.1 Phospholipids in Human/Animal Tissues 7
   1.3.2 Egg Phospholipids 8
   1.3.3 Milk Phospholipids 8
   1.3.4 Brain Phospholipids 8
   1.3.5 Phospholipids in Liver, Kidney, Muscles and other Tissues 10
   1.3.6 Plant Sources of Phospholipids 10
   1.3.7 Microbial Sources of Phospholipids 11

1.4 APPLICATIONS OF PHOSPHOLIPIDS 11

1.5 SEPERATION AND ANALYSIS OF PHOSPHOLIPIDS 18
   1.5.1 Separation of Phospholipids 18
   1.5.2 Analysis of Phospholipids 19

1.6. MAJOR CLASSES OF PHOSPHOLIPIDS 22
   1.6.1 Phosphatidyl choline 22
   1.6.2 Phosphatidyl ethanolamine 24
   1.6.3 Phosphatidyl inositol 25

1.7 STRUCTURED PHOSPHOLIPIDS 26
1.7.1 Enzymatic and Chemical Methods for
the Preparation of Structural Phospholipids 27

1.8 REFERENCES 31

CHAPTER 2: CHEMO-ENZYMATIC SYNTHESIS OF PLATELET
ACTIVATING FACTOR AND ITS ANALOGUES

2.1 INTRODUCTION 39
  2.1.1 Importance of Platelet Activating Factor 40

2.2 ISOLATION AND SYNTHESIS OF PLATELET
ACTIVATING FACTOR 43

2.3 PRESENT INVESTIGATION 51

2.4 MATERIALS AND METHODS 53
  2.4.1 Materials 53
  2.4.2 Methods 54
    2.4.2.1 Preparation of 1-O-tetradecyl-2,3-epoxypropane 54
    2.4.2.2 Preparation of 1-O-hexadecyl-2,3-epoxypropane 54
    2.4.2.3 Preparation of 1-O-octadecyl-2,3-epoxypropane 55
    2.4.2.4 Preparation of 1-O-tetradecyl-2,3-di-O-
          acetyl glycerol 55
    2.4.2.5 Preparation of 1-O-hexadecyl-2,3-di-O-
          acetyl glycerol 56
    2.4.2.6 Preparation of 1-O-octadecyl-2,3-di-O-
          acetyl glycerol 57
    2.4.2.7 Preparation of 1-O-tetradecyl-2-O-acetyl glycerol 58
    2.4.2.8 Preparation of 1-O-hexadecyl-2-O-acetyl glycerol 59
2.4.2.9 Preparation of 1-O-octadecyl-2-O-acetyl glycerol 59
2.4.2.10 Preparation of Choline toluene sulfonate 60
2.4.2.11 Preparation of 1-O-tetradecyl-2-O-acetyl-sn-
glycerol-3- phosphor choline 60
2.4.2.12 Preparation of 1-O-hexadecyl-2-O-acetyl-sn-
glycerol-3-phospho choline 61
2.4.2.13 Preparation of 1-O-octadecyl-2-O-acetyl-sn-
glycerol-3-phospho choline 62
2.4.2.14 Preparation of 1-O-alkyl-2-O-acetylglycerol 63
2.4.2.15 Preparation of 1-O-tetradecyl-2-O-acetyl-sn-
glycerol-3-Phospho ethanolamine 63
2.4.2.16 Preparation of 1-O-hexadecyl-2-O-acetyl-sn-
glycerol-3-phospho ethanolamine 64
2.4.12.17 Preparation of 1-O-octadecyl-2-O-acetyl-sn-
glycerol-3-phospho ethanolamine 65

2.5 RESULTS AND DISCUSSION 66
2.6 CONCLUSIONS 88
2.7 REFERENCES 88

CHAPTER 3: SYNTHESIS OF N-AMINO ACID PHOSPHATIDYL
ETHANOLAMINE DERIVATIVES

3.1 INTRODUCTION 94
   3.1.1 Phosphatidyl ethanolamine 94
   3.1.2 N-Acylphosphatidyl ethanolamine 98
   3.1.3 Mono- and Dimethyl Phosphatidyl ethanolamine 99
3.2 SYNTHESIS OF DERIVATIVES OF PHOSPHATIDYL ETHANOLAMINE 100

3.3 APPLICATIONS OF N-ACYL-PHOSPHATIDYL ETHANOLAMINE 103

3.3.1 Importance of Amino Acids 104

3.4 PRESENT INVESTIGATION 111

3.5 MATERIALS AND METHODS 113

3.5.1 Materials 113

3.5.2 Methods 113

3.5.2.1 Preparation of Egg Yolk Lecithin 114

3.5.2.2 Isolation of PE 114

3.5.2.3 Preparation of N-Protected Glycine 115

3.5.2.4 Preparation of N-Protected Valine 116

3.5.3.5 Preparation of N-Protected Leucine 116

3.5.3.6 Preparation of N-Protected Isoleucine 116

3.5.3.7 Preparation of N-Protected Phenylalanine 116

3.5.3.8 Coupling of Phosphatidyl ethanolamine with N-Protected Glycine 117

3.5.3.9 Coupling of Phosphatidyl ethanolamine with N-Protected Valine 118

3.5.3.10 Coupling of Phosphatidyl ethanolamine with N-Protected Leucine 118

3.5.3.11 Coupling of Phosphatidyl ethanolamine with N-Protected Isoleucine 119
3.5.3.12 Coupling of Phosphatidyl ethanolamine with N-Protected Phenylalanine 119

3.5.3.13 De-protection of PE-N-Protected Glycine 120

3.5.3.14 De-protection of PE-N-Protected Valine 121

3.5.3.15 De-protection of PE-N-Protected Leucine 121

3.4.3.16 De-protection of PE-N-Protected Isoleucine 122

3.5.3.17 De-protection of PE-N-Protected Phenylalanine 122

3.6 GENERAL PROCEDURE FOR ANTIMICROBIAL ACTIVITY STUDIES 123

3.6.1 General Procedure for Antibacterial Activity 123

3.6.2 General Procedure for Antifungal Activity 124

3.7 RESULTS AND DISCUSSION 124

3.7.1 Anti Microbial Activity Evaluation of Phosphatidylethanolamine-N-Amino acids 150

3.8 CONCLUSIONS 153

3.9 REFERENCES 155

CHAPTER 4: PHOSPHOLIPASE CATALYZED PREPARATION OF HYDROXY FATTY ACID RICH PHOSPHOLIPIDS

4.1 INTRODUCTION 160

4.2 LITERATURE SURVEY 161

4.3 APPLICATIONS OF PHOSPHOLIPIDS AND HYDROXY FATTY ACID CONTAINING PHOSPHOLIPIDS 168

4.4 PRESENT INVESTIGATION 171

4.5 MATERIALS AND METHODS 172

4.5.1 Materials 172
4.5.2 Methods

4.5.2.1 Enzyme Immobilization

4.5.2.2 Separation of Methyl Ricinoleate from CME

4.5.2.3 Isolation of Egg Phospholipid mixture and Isolation of PC from Egg Lecithin

4.5.2.4 Isolation of Soya Phospholipid mixture and Isolation of PC From Soybean Lecithin

4.5.2.5 General Procedure for Transesterification of Egg PC with Methyl ricinoleate

4.5.2.6 General Procedure for Transesterification of Soy PC with Methyl ricinoleate

4.5.2.7 Gas Chromatographic Analysis

4.5.2.8 General Procedure for Tranesterification of Egg PL with Methyl ricinoleate

4.5.2.9 General Procedure for Tranesterification of Soy PL with Methyl ricinoleate

4.5.2.10 Enzymatic Hydrolysis of Egg Phosphatidyl choline to Determine Positional Distribution of Fatty Acids

4.5.2.11 Enzymatic Hydrolysis of 1-Ricinoleoyl-2-acyl-sn-glycero-3-Phospho choline to Determine Positional Distribution of Fatty Acids

4.5.2.12 Emulsifying Power

4.6 RESULTS AND DISCUSSION

4.6.1 Incorporation of Ricinoleic Acid into Egg PC
4.6.1.1 Effect of Lipase Dosage 181
4.6.1.2 Effect of Molar Ratio 183
4.6.1.3 Effect of Reaction Period 184
4.6.2 Incorporation of Ricinoleic Acid into Soy PC 185
4.6.2.1 Effect of Lipase Dosage 186
4.6.2.2 Effect of Molar Ratio 187
4.6.2.3 Effect of Reaction Period 188
4.7.3 Emulsification Power of Phospholipids and Modified Phospholipids 190
4.7.3.1 Emulsifying Power 191
4.8 CONCLUSIONS 191
4.9 REFERENCES 193
