3.2 Modes of Metal Transfer 29
3.3 Process Control Variables of CO₂ Welding 31
3.4 Welding Defects and its Causes 37
3.5 Conclusion 39

CHAPTER – 04  Development of Welding Signature Analyzer 40

Introduction 40
4.1 Operation of WSA 40
4.2 Major Component used in WSA 41
4.2.1 Voltage and Current Transducer 41
4.2.2 Data Acquisition System 43
4.2.3 Dual OP AMP and Voltage Reference AP4300 44
4.2.4 Industrial Computer 45
4.2.5 Computer Mother Board Specifications 46
4.2.6 Conclusion 50

CHAPTER – 05  WSA Software for Online/Offline Analysis of Welding Signature 51

Introduction 51
5.1 Online Mode of Operation of WSA 51
5.2 Offline Mode of Operation of WSA 53
5.3 Statistical Parameters and their Significance 54
5.3.1 Correlation Co-efficient 54
5.3.2 Measures of Central Tendencies

5.3.3 Measures of Dispersion

5.3.4 Co-efficient of Variation

5.3.5 Measure of Skewness

5.3.6 Measure of Kurtosis

5.3.7 Normal Distribution Curve

5.3.8 Z-Score Distribution

5.4 Procedure of Monitoring and Recording

5.5 Procedure of Offline Analysis

5.6 Conclusion

CHAPTER – 06

Real Time Monitoring and Recording

Introduction

6.1 Experimental Setup

6.2 Step by Step Procedure of Online Monitoring

6.3 Analysis of Welding Signature

6.3.1 Recorded Welding Current and Voltage Signature

6.3.2 Macro Analysis of Welding Current Signature

6.3.3 Macro Analysis of Welding Voltage Signature

6.4 Micro Analysis of Welding Current Signature

6.5 Method of Fixing Reference Current Signature

6.6 Upper and Lower Control Limits of Reference Signature

6.7 Macro Analysis of Welding Signatures and their Results
CHAPTER – 07  
Calculation of SCT, NBT and CT

Introduction

7.1 SCT, NBT and CT

7.2 Algorithm for Computing SCT, NBT and CT

7.3 SCT and NBT of Welding Signature in 30-35sec. of Test -01 Result

7.4 SCT and NBT of Welding Signature in 30-35sec. of Test -02 Result

7.5 SCT and NBT of Welding Signature in 30-35sec. of Test -03 Result

7.6 SCT and NBT of Welding Signature in 30-35sec. of Test -04 Result

7.7 Conclusion

CHAPTER – 08  
Validation Test

Introduction

8.1 Assessment of Welding Machine Performance

8.2 Assessment of Welding Machine Performance

8.3 Identified Weld Defects in Tee Joint [Test-05]

8.4 Macro analysis of Welding Signatures of Test-05

8.5 Micro analysis of Welding Signatures of Test-05

8.6 Conclusion
Conclusion, Contribution and Future Scope Future Research Work

9.1 Conclusion 127
9.2 Contributions 128
9.3 List of Publications from this Research 128
9.4 Scope for Future Research 129
List of References 130
