ACKNOWLEDGEMENT

I would like to first thank my Supervisor Dr. V. KAMARAJ, for giving me the opportunity to work under his guidance. His extensive knowledge, broad vision and creative thinking have been a source of inspiration for me. His understanding, insightful suggestions, encouraging and personal guidance have provided a sound basis for my research. Without his continuous encouragement and support, this work would not have been completed successfully.

I would like to acknowledge the Management and the Principal of SSN College of Engineering, India for their continuous support to carry out research work. I would like to thank my Doctoral committee member Dr. R. Arumugam for his encouragement and guidance.

Thanks are also due to Dr. V. Rajini, Dr. S. Ramkumar and Dr. R. Ramaprabha for their valuable suggestions during the course of work.

I would like to express my thanks to my friends for their support and students who have worked with me throughout this period. I am indebted to all those who have directly or indirectly helped me in this work.

But for my family’s encouragement and help, this research work would not have been possible. To all my family members, I owe the most.

BALAJI M
