ACKNOWLEDGEMENT

It gives me immense pleasure to record my great debt of gratitude and appreciation to Dr. V.N. Rajasekharan Pillai, Professor and Director, School of Chemical Sciences, Mahatma Gandhi University, who has patiently guided and directed this doctoral thesis with keen interest and competence. Without his constant guidance and unfailing encouragement this study would not have been possible. I take this opportunity to express my profound indebtedness for his kind support throughout the course of this research.

I am deeply grateful to Dr. P.M. Madhusudanan, Visiting Professor, School of Chemical Sciences, Mahatma Gandhi University for the invaluable help in the interpretation of the thermoanalytical and physicochemical data in this study.

My special thanks are due to all my colleagues in the School of Chemical Sciences, Mahatma Gandhi University for their whole-hearted cooperation and support. I am thankful to Mr. K.V. Sudhakaran, Mr. Sunny Kuriakose, Ms. Sheela Chacko and Ms. Tessymol Mathew, Research Scholars for their help at different stages of this work. I am also grateful to the technical and office staff for their indispensable help towards the successful completion of this thesis.

I thank the Mahatma Gandhi University, Kottayam for the award of a Junior Research Fellowship during the tenure of this work.
I wish to thank the management, especially Rev. Fr. Luke Puthiyakunnel, Principal, St. Stephen's College, Uzhavoor, for his constant encouragement and help rendered throughout the course of this work. I take this opportunity to express my gratitude to all my colleagues in St. Stephen's College, Uzhavoor.

The thermal analyses obtained from the Catalysis Division, Indian Institute of Technology (IIT), Madras, spectral analyses from the Regional Sophisticated Instrumentation Centre (RSIC), IIT, Madras and Central Leather Research Institute (CLRI), Madras, and scanning electron micrographs from the Regional Research Laboratory (RRL), Thiruvananthapuram are gratefully acknowledged.

Finally, I express my sincere thanks to Mr. George Joseph for the neat typing of this thesis and Mr. K.A. James, Laboratory Technician, School of Chemical Sciences, for the excellent drawings.

BEENA MATHEW
