2.10. Behavioural profile or temperament 50
2.11. Personality 55
2.12. Self-concept 66
2.13. Role of clothing in the personality development of children. 72
2.14. Selection of materials for children's dresses. 74
2.15. Evaluation of the literature and the position of the present study 77
2.16. The present study - A resume 81

Chapter - III - Hypotheses

Preliminary considerations 84
Derivation of Hypotheses 85

Chapter - IV - The study - structure and method

4.1. Introduction 91
4.2. Design of the study 92
4.3. Nature of the study 93
4.4. Sample 93
4.5. Identification of the areas 94
4.6. Tools for the measurement 94
4.6.1. Construction of the schedule of expressive behaviour 95
4.6.2. Construction of the Pre-schooler's Self Concept and Picture Test (PSCPT) 96
4.6.3. Construction of the test for colour, design, value of colour preference and identification of dresses for various occasions. 98
4.6.4. Interview schedule for mothers 101
4.6.5. Parent questionnaire for behavioural profile or temperament. 102
4.7. Pilot study 103
4.8. Main study 104
4.9. Treatment of the data 107
Chapter V : Results

Part I

5.1. Effect of Income on the following:
   5.1.1. Self-concept
   5.1.2. Colour preference
   5.1.3. Design preference
   5.1.4. Colour value preference
   5.1.5. Identification of garments for various occasions
   5.1.6. Intensity of reaction
   5.1.7. Reaction pattern

Purchasing Habits

5.1.8. Percentage of clothing allowance for children
5.1.9. Amounts spent for a dress
5.1.10. Persons involved in clothing purchases
5.1.11. Families taking opinion of the child while purchasing
5.1.12. Preference of dresses
5.1.13. Factors influencing clothing purchases
5.1.14. Clothing preferences
5.1.15. Number of dresses the children possess
5.1.16. Preference of material for children's clothing
5.1.17. Preference of Readymade, Home-made and Tailor made garments
5.1.18. Problems faced while purchasing children's clothing.
5.1.19. Identification of dresses for various occasions

Part - II

Effect of dressing

5.2. Difference between well dressed and ill dressed children in the following:
5.2.1. Self concept
5.2.2. Reaction pattern
5.2.3. Intensity of reaction
5.2.4. Colour preference
5.2.5. Design preference
5.2.6. Colour value preference
5.2.7. Identification of dresses for various occasions
5.2.8. Expressive behaviour

Part - III
Gender
5.3 Difference of male and female children in the following:
5.3.1 Self concept
5.3.2 Reaction pattern
5.3.3 Intensity of reaction
5.3.4 Colour preference
5.3.5 Design preference
5.3.6 Colour value preference
5.3.7 Identification of dresses for various occasions.

Part - IV
Relation between various components of the study:
5.4 Correlation Co-efficient of the following:
5.4.1 Temperament and self-concept
5.4.2 Preference of colour and self-concept.
5.4.3 Preference design and self-concept
5.4.4 Colour value preference and Self-concept.
5.4.5 Self-concept and ideal self concept
5.4.6 Preference of design mother-child agreement
5.4.7. Preference of colour mother-child agreement
5.4.8. Reaction pattern and colour preferences
5.4.9. Reaction pattern and design preference
5.4.10. Reaction pattern and value of colour preference
5.4.11. Intensity of Reaction and colour preference
5.4.12. Intensity of Reaction and design preference
5.4.13. Intensity of Reaction and value of colour preference

Chapter VI:
Discussions

Part-I

6.1 Effect of income on the following:
6.1.1 Self-concept
6.1.2 Preference of colour
6.1.3 Preference of design
6.1.4 Preference of colour value
6.1.5 Identification of dresses for various occasions
6.1.6 Intensity of reaction
6.1.7 Reaction pattern
6.1.8 Purchase of dresses
6.1.9. Percentage of clothing allowance for children
6.1.10. Amount spent for a dress
6.1.11. Persons involved in clothing purchases
6.1.12. Seeking opinion of the child while purchasing.
6.1.13. Preference of dresses
6.1.14. Factors influencing clothing purchases
6.1.15. Time of purchase

6.1.16. Clothing preference

6.1.17. Number of dresses the child possess

6.1.18. Preference of material

6.1.19. Preference of Readymade, Home-made and Tailor made garments

6.1.20. Problems faced

6.1.21. Identification of dresses for various occasions

Part II

Difference between well dressed and ill dressed children in the following:

6.2.1. Self concept

6.2.2. Reaction pattern

6.2.3. Intensity of reaction

6.2.4. Colour preference

6.2.5. Design preference

6.2.6. Value preference

6.2.7. Identification of dresses for various occasions

6.2.8. Expressive behaviour

Part III

Gender

6.3. Difference of male and female children in the following:

6.3.1. Self concept

6.3.2. Reaction pattern

6.3.3. Intensity of reaction

6.3.4. Preference of colour
Part-IV
Relation between various components of the study

6.4. Correlation Co-efficient of the following:

6.4.1 Temperament and self-concept 163
6.4.2 Self-concept and preference of colour 163
6.4.3. Self-concept and preference of design 164
6.4.4. Self-concept and value of colour preference 164
6.4.5. Self-concept and ideal self concept 164
6.4.6. Colour and design preference by mother-child for child's dresses. 165
6.4.7. Reaction pattern and colour, design and colour value preference 165
6.4.8. Intensity of reaction and preference of colour, design and colour value. 166

Chapter-VIII- Summary and Conclusions

7.1 Summary 168
7.2 Conclusions 170
7.3 Problems and limitations of the study 171
7.4 Implication of the study. 171
