PREFACE AND ACKNOWLEDGEMENT

It is my great privilege to express my most sincere gratitude to my supervisors Dr. Sanjeev Sharma and Prof Bani Singh (HOD), Department of Mathematics, Jaypee Institute of Information Technology, Noida, under whom supreme and enlightened guidance I have been able to accomplish this work. I gratefully acknowledge my sincere indebtedness to their illuminating guidance, whole-hearted co-operation right from beginning of this research to its write-up and completion. I will always remain grateful to them for giving direction to my life.

It is my great pleasure to acknowledge my gratitude to our Vice-Chancellor Prof. J. P. Gupta, Prof. Yaj Medury (COO), Prof. S.K. Khanna (Member Supervisory Board), Prof. S. L. Maskara (Dean A & R) and Col.Vijay Kumar (Registrar).

I owe my most sincere gratitude to Prof. S.K. Gupta of H.P. University, who gave me untiring help during my difficult moments. In every sense, none of this work would have been possible without him. I would like to express my heartiest thanks to all the members of Department of Mathematics particularly Dr. B. P. Chamola and Dr A. K. Aggarwal. I owe my sincere thanks to all other Departments for their sound counsel and useful advice. I am grateful to Dr. Sanjay Kataria and Mr. Akhilesh Sachan and all other members of library and server, for providing support in their respective fields despite their numerous duties and busy schedule.

I am warmly thankful to Dr. Pankaj Thakur and Mr. Ravindra Kumar for their valuable advice and friendly help. Their extensive discussions around my work and interesting explorations in operations have been very helpful for this study.

My heartfelt thanks and appreciation are due to all my friends, who helped me in innumerable ways and to an unlimited extent.

My words fail to get limits to express my gratitude to my parents Er. D.K. Sahni and Dr. S.B. Sahni and all other family members who have always been a constant source of inspiration and encouragement. My head bows in abeyance to them for enabling me to realize my most cherished dream.

Last, but not least, I would like to thank my wife Mrs. Ritu Sahni for her understanding and love during the past few years and giving me the most beautiful gift of my life, my son Mohit Sahni . Her support and encouragement was in the end what made this thesis possible.

This work could not have been completed if God has not provided me enough patience and power during this period. I shall be highly grateful to the Almighty.
“Timeless is of great importance in research. A development cannot be forced, but most await the accumulation of the necessary skills and understandings. The investigator, though he is conscious principally of the exertions he makes in paddling his own canoe, do never tides and currents of which he may not be aware carry along the less. He should therefore spend a little of his time in seeing how all the other canoes are getting along, for he may thereby detect a current of which he can take advantage”.

I have tried to give due acknowledgements to all, but I apologize for any involuntary, omission.

(Manoj Sahni)
