ACKNOWLEDGEMENT

Achievement of a goal is not one person’s job but it is accomplished by the guidance and cooperation of each other. I would like to acknowledge and extend my heartfelt gratitude to all those who have made this work possible. This Doctoral research work which could not have been possible without inspiring guidance of my respected guide, Dr. P.C. Sharma, Professor Microbiology, Department of Microbiology, Shoolini University, Solan, Himachal Pradesh, India. It is my privilege and honour to owe my immense gratitude and respect to my mentor and guide for his significant guidance, creative ideas, and constructive comments and finally during the compilation of my thesis he guided me step by step. Thank you very much sir.

I would like to express my heartiest thanks to Professor P. K. Khosla, vice-chancellor Shoolini University Solan, for providing the laboratory facilities in the department of Microbiology to carry out the experimental work and also for his kind blessing.

I would like to thank my committee members Dr. Dinesh Kumar, Associate Professor and Dr. Astha Tripathi, Assistant Professor, for their suggestions and advice that have been helpful in this study.

I would like to thank Dr. Anil Kanga, Professor and Head Department of Microbiology and Dr. Ramesh Guleria, Assistant Professor Department of Microbiology, IGMC Shimla for their kind support and help in collection of clinical isolates.

I am extremely thankful to my dear friend Sandip Patil for his help and support during my entire course of study. His moral support and help is unforgettable. Sincere thanks of appreciation also go to my friends Amit Kumar and Vikesh Kumar Bhatia for their help, moral support, and compilation and in thesis designing. Thank you so much Vikesh ji. I would like to thank my other labmates who provide supportive environment of work in the Laboratory. I also want to thank Mr. Delip Singh and Babu Ram (Lab Attendants Microbiology lab).

My sincere thanks also go to Dr. P. Bhalla, Director and Head, Department of Microbiology, National Phage Typing Centre, Maulana Azad Medical College, New Delhi for her kind help in bacteriophage typing.
I am also extremely indebted to **Dr. Anil Singla**, Director, Himachal Dental College and Hospital, Sundernagar (Mandi) who permit me to peruse Ph. D. at Shoolini University.

I would like to thank my family for their patients, constant support and encouragement throughout my studies. The gratitude that I hold in my heart for them is hard to express just in printed words.

My sincere thanks also go to **Mrs. Sharma** for her moral support and kind blessing. Thank you so much mam.

Finally, I would like to thank the divine powers of almighty God whose generous blessing and enough patience in me to complete this work.

**Devender Kumar Sharma**
