ACKNOWLEDGEMENT

Firstly, I would like to record my gratitude to Prof. M. B. Deshmukh, Co-ordinator of Agrochemicals and Pest Management and Professor of Chemistry for his supervision, advice and guidance from the very early stage of this research as well as giving me an extra-ordinary experience through the work. I am also thankful for the excellent example he as provided as a successful Organic chemist and professor. I very much appreciate his enthusiasm, intensity, willingness without which the dissertation would not have been possible. He has always encouraged me to live intensively, even when I think about doing something else.

This thesis was arisen in the part of our years of research that has been done since start to my Ph.D work. By that time, I referred number of research papers which are published related to neonicotinoid groups from number of researchers all over the world. I mentioned hear the name of Peter manifish from Syngenta group, Switzerland who provided me their all published research papers related to their vast research work on neonicotinoids, specially on thiamethoxam, primarily which helped me to better understand the concept of neonicotinoids and to write the synopsis of my Ph. D. work.

I would like to thank the Co-ordinators especially of the department of agrochemicals and pest management to give me an opportunity to do work in addition to the laboratory facilities for research work. Also I sincerely thank Prof. M. A. Anuse (Former Co-ordinator AgPm), Dr. Sangram H. Patil, Dr. Anil A. Jagtap and Dr. Dasharath Oulkar, Scientist National Research Centre for Grapes, Pune for giving me a moral support to the importance of life and work. Secondly, I am impressed by the company of other research students, Vikas jadhav, Shankar Sambavekar, Prakash Sambavekar, Akshay Bhosale, Mayur Aitawade and Prasad Patil.

I would like to acknowledge gratefully the enthusiastic nature and interest shown by Dr. Pandurang Mohite and Dr. Jai Ghosh.

I thank the laboratory staff shri Gawade, Korvi, Yuvraj Khade and Buchade for their cooperation during my research work.
I especially thank the department of USIC for provide spectral analysis, especially to Kalas and Mohite. Similarly, I thank to Chemistry Department for providing me IR and NMR spectral analysis especially to Mr. Makarand Kulkarni.

I also thank to the rest of my friends who shared me a glory and sadness of day-to-day research cooperation by Dr. Shailesh Waghmare, Naiem Nadaf, Shripad Surwase, Chidambar Jalkute from microbiology department and Swapnil Phugare, Dr. Amar Telke, Dr. Dayanand Kalyani, Navnath Kumbhar, Bajarang Kumbhar from Biochemistry department.

My parents My father Anil, My mother Trishala and My brother Ashish and My sisters Ashmita, Varsha, Vaishali and Trupti. deserve special mention for their inspirational support and prayers.

Owe again remain to mention especially the name of my relative Jinender Melvanki working on AstraZeneca Bangalore, who changed the direction of my life from meaningless to meaningful things and showed me what exact position, I can stand on my life and what I can do for my better future.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.
