List of Tables

Chapter 1: Introduction and literature review
Table 1.1 Disease reaction of differential chickpea cultivars to inoculation with pathogenic races of *Fusarium oxysporum* f. sp *ciceris*

Chapter 2: Materials and methods
Table 2.1 SCAR primers designed from AFLP fragments
Table 2.2 Oligonucleotide pairs used for gene specific amplification
Table 2.3 Primers used for normalization of cDNA
Table 2.4 Primers used for expression analysis of pathogenesis related genes in chickpea-*Foc* transcriptome
Table 2.5 Primers used for expression analysis of defense related genes in chickpea-*Foc* transcriptome

Chapter 3: Results
Table 3.1 AFLP screening of *Fusarium oxysporum* f. sp *ciceris* race 1 and 2, and their isolates
Table 3.2 Homologies of race specific AFLP fragments to reported sequences in NCBI database
Table 3.3 Homologies of trypsin digested *Foc* proteins analyzed using MASCOT software
Table 3.4 Homology of cDNA clones generated using random primers to reported sequences in NCBI database
