## CONTENTS

List of Tables .......................................................... I  
List of Figures ........................................................... II  

**Chapter 1**  
**Review of Literature and Orientation to the Present Research Work**

1.1 Introduction ......................................................... 1  
1.2 A Highlight of Debate regarding Standard Deviation V/S Mean Deviation ........................................... 4  
1.3 Orientation to the Research Work of the Thesis ................................................................. 10  
1.4 Main Objectives of the Research Work presented in the Thesis .............................................. 12  
1.5 Layout of the Thesis .................................................. 13  

**Chapter 2**  
**Moderate Distribution: An Alternative (OR Moderated) Normal Distribution**

2.1 Introduction .......................................................... 15  
2.2 Proposed Alternative (OR Moderated) Normal Probability Distribution and Justification for Naming it as Moderate Distribution .............................................. 19  
2.3 Standard Moderate Distribution .................................. 25  
2.4 Area under Moderate Curve and related Properties ........................................................ 30  
2.5 Moderate Distribution as Limiting Form of Binomial Distribution .................................................... 33  
2.6 Moderate Distribution as a Limiting Form of Poisson Distribution .............................................. 37  
2.7 Central Limit Theorem (C.L.T.) Based on Mean Error ............................................................... 39  
2.8 Some Properties and Results ......................................... 41  
2.9 Chebychev’s Inequality based on Mean Deviation ................................................................. 66
Chapter 3  \( \psi^2 \) (Psi-Square) Distribution: An Alternative Chi-Square Distribution

3.1 Introduction  73
3.2 Psi-Square Distribution with 1 D.F.  73
3.3 Psi-Square Distribution with n D.F.  75
3.4 Some Properties and Results  78
3.5 Approximating (OR Transforming) Psi-Square Variate using Moderate Variate  107
3.6 Applications of Psi - Square  124
3.7 Non Central Psi - Square Distribution  129

Chapter 4  \( t \) and \( F \) Distributions: Under Moderateness Assumption  134-137

4.1 Introduction  134
4.2 \( t \) – Distribution  134
4.3 \( F \) – Distribution  135
4.4 Exact Sampling Tests for Testing Hypotheses  136
\( H_0: \delta_1=\delta_2 \)

Chapter 5  Drawing Inference about Mean Deviation: Under Moderateness Assumption  138-159

5.1 Introduction  138
5.2 Point Estimation  138
5.3 Interval Estimation  154

Chapter 6  Large Sample Tests: Based on Moderate Distribution  160-166

6.1 Introduction  160
6.2 Rejection Rule in Large Sample Tests at \( \alpha \) % Level of Significance  160
