Acknowledgements

First and foremost, My hearty thanks and deep gratitude go to Prof. R. Sethuraman, Vice-chancellor of our SASTRA University for his untiring efforts to bring up our institution to a world class University where in doing research is almost to become a day to day activity of the faculty and students. His magnanimity of sanctioning permission to conduct international conference every year in the appropriate and current topic of research, establishing two research chairs one on Discrete Mathematics and other on Number Theory provide adequate opportunities for research scholars to take up research work in technological arena, where rigorous Mathematical treatment brings algorithmic insight into the chosen problems. His directions and permission to authorities to conduct seminar, workshops, lectures from time to time to enrich research activities, timely research incentives, inspire the researchers to learn more and more. I gained a lot from lectures delivered by experts which form the genesis of my thesis. His efforts of establishing such an institute with a very good platform for research work has created vibrant and ever inspiring research environment. It is my ever bound duty to express my ineffable gratitude to him.

Next I wish to thank Prof. S. Vaithyasubramaniam, Dean planning and development for his manifold plans to develop the research activities of hard working
researchers to set new goals in multidisciplinary areas. His salient and simple managerial principles coupled with his future vision often multiply the research activities of teachers like me. His magnanimity of providing Laptops to all faculty has signalled out the need for change of teaching methodology. As a consequence, the development in teaching learning system has started bringing laurels to our organisation. Teachers are able to take up time bound research activities by his initiatives. I wish to put it in record my hearty thanks to him.

I wish to thank Dr. S. Swaminathan, Dean, Sponsored research for his constant efforts of arranging a series of invited lectures from eminent personalities both from abroad and this country. Many and varied are the development activities undertaken by him. I wish to express my sincere thanks to him.

Many thanks are due to Prof. S.N.Srivastava, Registrar SASTRA University. I wish to thank my advisor Dr. K. Kannan, Dean, School of Humanities and Sciences, SASTRA University for his guidance and appropriate instructions at right places in doing my research work. Without his support and encouragement the ideas explored in this thesis would never have been materialized.

I sincerely thank for the support and directions provided by my doctoral committee members Dr. S. Sundaram, Professor of Electrical and Instrumentation Engineering, SASTRA University, Dr. Subramaniya Katte, Professor of Mechanical Engineering, SASTRA University, and Dr. V. Saavithri, Professor of Mathematics, Nehru Memorial College, Puthanampatti.

I extend my whole hearted thanks to Dr. T. R. Sivaramakrishnan, Dean of Research, SASTRA University for his periodic instructions and advices to take up right methodology to analyze a few important propositions in my research work. My heartful thanks are due to Dr. K. Thiyagarajan, Dean/ Research and
Dr. R. Chandramouli, Associate Dean/ Research for their encouragement to all researchers of our university.

My gratitude is always there for Dr. T. R. Neelakandan, Associate Dean of Civil Engineering, SASTRA University for his comments to revise the second chapter in apt manner.

My heartfelt thanks are due to Prof. P. Kandasamy and Prof. N. Anantharaman, Former Registrars, SASTRA University and Dr. M. Thiyagarajan, Professor, School of Computing, SASTRA University.

My thanks are there for the faculty in Department of Mathematics and for each of Administrative staff of VC secretariate and Registrar’s office for their needy help and friendly cooperation. I would like to thank my parents for their support and encouragement. Words fail me to express my deepest thanks from the bottom of my heart to my wife for her love and encouragement which gave me ever increasing strength and confidence in my research tenure.

Ineffable gratitude and pious feelings stem out from the bottom of my heart to dedicate everything to my guiding deity Lord Ramabaktha Anjaneya.

-G. Hariharan
