1 Introduction and review of literature

1.1 Water as a mode of transmission for viruses

1.2 History of drinking water treatment

1.3 Viruses in water

1.4 Waterborne outbreak of viral diseases

1.5 Waterborne viruses

1.5.1 Enteric hepatitis viruses

1.3.4.1 Hepatitis A

1.3.4.2 Hepatitis E

1.5.2 Enteroviruses

1.5.3 Waterborne viruses causing gastroenteritis

1.5.3.1 Rotavirus

1.5.3.2 Adenoviruses

1.5.3.3 Astroviruses

1.5.3.4 Human caliciviruses

1.5.3.5 Other gastroenteritis-producing viruses

1.6 Factors controlling virus survival

1.6.1 Temperature

1.6.2 PH

1.6.3 Light

1.6.4 Salts and metals

1.6.5 Interfaces

1.6.6 Microflora

1.6.7 Other factors

1.7 Viruses versus bacteria as indicator of microbiological contamination of water
1.8 Virus removal during drinking water treatment
   1.8.1 Experimental addition of viruses (or seeding studies)
   1.8.2 Indigenous virus studies

1.9 Methods for concentration of viruses from water samples
   1.9.1 Adsorption to electronegative membranes and cartridges
   1.9.2 Adsorption to electropositive membranes and cartridges
   1.9.3 Adsorption to glass wool
   1.9.4 Adsorption to glass powder
   1.9.5 Other adsorbents
   1.9.6 Ultrafiltration
   1.9.7 Ultracentrifugation
   1.9.8 Other methods
   1.9.9 Secondary concentration

1.10 Methods for Detection of viruses
   1.10.1 Cell culture assays
   1.10.2 Molecular assays
      1.10.2.1 Polymerase Chain Reaction
      1.10.2.2 Multiplex PCR
      1.10.2.3 Real-time PCR
      1.10.2.4 Integrated cell culture PCR

1.11 Assessing viral infectivity

1.12 Detection of enteric viruses in environmental samples:
   The Indian scenario
2 Aims and objectives 49

3 Material and methods 50-75

4 Results 76-111

5 Discussion 112-124

6 Conclusion 125

7 Bibliography 126-159
