LIST OF TABLES

Table 1 Characteristics of the River Basins Selected 29
Table 2 Average Monthly Rainfall (mm) in Pamba River Basin 31
Table 3 Annual Flow and Sediment Load at Malakkara CWC Gauge Site 33
Table 4 Characteristics of Kozhy Thodu Watershed 36
Table 5 Characteristics of Valiya Thodu Watershed 38
Table 6 Characteristics of Kiri Thodu Watershed 39
Table 7 Discharge and Sediment Characteristics of the Rivers 52
Table 8 Seasonal Variation of % Q and % S for the Rivers 53
Table 9 Variation of Discharge, Q (MCM) and Sediment Load, S (ton) 56
Table 10 Variation of the S/Q and S/A Ratios for the Rivers 60
Table 11 Rating Curve Parameters ‘a’ and ‘b’ Using Monthly Data 66
Table 12 Rating Curve Parameters and Goodness of Fit Test Results 72
Table 13 Rating Curves for Tributaries of Pamba 73
Table 14 % Contribution of Sediment Load from Major Tributaries 73
Table 15 Storm Events Identified for Kozhy Thodu Watershed 75
Table 16 Storm Events Identified for Valiya Thodu Watershed 75
Table 17 Storm Events Identified for Kiri Thodu Watershed 76
Table 18 Relationship Between Effective Sediment Load, Runoff and Rainfall 76
Table 19 Ordinates of Average USGs for the Three Micro-Watersheds 77
Table 20 K-Factor for Different Soils of the Micro-Watersheds 84
Table 21 CP-Factor for Different Land Use Classes for the Micro-Watersheds 85
Table 22 Comparison of Observed and Predicted (MUSLE) Soil Loss (ton/km²) 89
Table 23 Results from Application of USG 89
