1 INTRODUCTION
  1.1 Preface
  1.2 Review of Literature
  1.3 Scope of The Present Study

2 MATERIALS AND METHODS
  2.1 Sample
  2.2 Collection and transport of Samples
  2.3 Medium
  2.4 Isolation of Heterotrophic bacteria
  2.5 Screening of the cultures for phosphate uptake and polyP Accumulation
    2.5.1 First phase screening
      2.5.1.1 Inoculum preparation
      2.5.1.2 Inoculation and Incubation
      2.5.1.3 Assay
        2.5.1.3.1 Estimation of various Phosphates
        2.5.1.3.2 Total Cellular Protein
    2.5.2 Second Phase Screening
      2.5.2.1 Total cell protein
      2.5.2.2 Estimation of the phosphates
  2.6 Identification of Bacteria
  2.7 Selection of Potential Strains for further studies
  2.8 Impact of different conc. of phosphate in the medium on Pi uptake and polyphosphate accumulation by marine bacteria
    2.8.1 Medium
    2.8.2 Inoculum preparation
    2.8.3 Inoculation and Incubation
    2.8.4 Estimation of Biomass and Phosphates
  2.9 Impact of pH on Pi uptake and polyP accumulation by marine bacteria
2.10 Impact of Incubation Temperature on Pi uptake and polyP accumulation by Marine bacteria 27

2.11 Impact of Additional Sodium chloride concentration in the medium on Pi Uptake and polyP accumulation by marine bacteria 27

2.12 Effect of other additional inorganic salts in the medium on Pi uptake and polyP accumulation by marine bacteria 28
  2.12.1 KCl 28
  2.12.2 CaCl₂ 28
  2.12.3 MgSO₄ 29
  2.12.4 Sodium Citrate 29
  2.12.5 Ammonium Nitrate 29

2.13 Effect of other additional organic carbon sources in the medium on Pi uptake and polyP accumulation by marine bacteria 30
  2.13.1 Peptone 30
  2.13.2 Yeast Extract 30
  2.13.3 Glucose 30

2.14 Statistical analyses 31

3 RESULTS 32

3.1 Screening of polyphosphate accumulating bacteria from marine environments 32
  3.1.1 First Phase Screening 32
  3.1.2 Identification of Short listed Isolates 33
  3.1.3 Second Phase Screening 33
    3.1.3.1 Biomass 33
    3.1.3.2 Phosphate Removal 34
    3.1.3.3 Cellular free Pi 35
    3.1.3.4 Low Molecular Weight Phosphates 35
    3.1.3.5 Polyphosphate 36
    3.1.3.6 Nucleic acid phosphates 37

3.2 Selection of Potential Strains capable of accumulating polyphosphate 38
3.3. Effect of Phosphate conc. in the medium on phosphate uptake and polyphosphate accumulation by marine bacteria 38

3.4 Effect of pH on phosphate uptake and polyphosphate accumulation by Marine bacteria *Vibrio* sp 41

3.5 Effect of Temperature on Pi uptake and polyP accumulation by marine bacteria 43

3.6 Effect of Sodium Chloride 44

3.7 Other Inorganic Salts 46

3.7.1 Potassium Chloride (KCl) 46

3.7.2 Calcium Chloride 48

3.7.3 Magnesium Sulphate 50

3.7.4 Sodium Citrate 51

3.7.5 Ammonium Nitrate 53

3.8 Other Additional Organic Carbon Sources 55

3.8.1 Peptone 55

3.8.2 Yeast Extract 57

3.8.3 Glucose 58

4 DISCUSSION 61

5 SUMMARY & CONCLUSION 78
