Acknowledgement

“I've met angels wearing the disguise of ordinary people living ordinary lives”

On the recollection of so many great favours, guidance and blessings, I now, with a high sense of gratitude offer my sincere thanks to a perfectionist and an admirable scientist Dr. K. M. Paknikar my guide, my mentor. During the course of Ph.D. work I was sustained by one piece of inestimable good fortune...I had for a guide a man of immense tolerance, patient wisdom and a gentle yet firm eternal strength. I agree with the saying "A lot of people have gone further than they thought they could because someone else thought they could"...at times of self-doubt and difficulties I did not give up because my mentor would not let me give up! Feelings of worth can flourish only in an atmosphere where individual differences are appreciated, mistakes are tolerated, communication is open and rules are flexible, Dr. Paknikar at all times provided this environment in the laboratory. He has helped me tremendously not only in acquiring skills as a researcher but also in my wholesome development as an individual. His kindness to his students says, "I want you to be happy!!!" It is his mentoring because of which I now recognize that when faced with a challenge or an adversity look for a way, not a way out.

I thank Dr. Kalyan Banerjee, President MACS: Agharkar Research institute (A.R.I.), Pune, for his invaluable scientific advice.

I would like to thank Dr. V. S. Rao, Former director, Agharkar Research Institute, Pune, for providing me with the facilities required to carry out my Ph.D. work.

I wish to thank Dr. Mrs. P. P. Kanekar, Acting director, Agharkar Research Institute, for her support and care.

I would like to thank Dr. S. L. Shinde, Scientist, Animal Sciences Division, A.R.I., for permitting me to carry out a part of my research work at his laboratory.

I am grateful to Dr. Jyutika Rajwade, Scientist, Centre for Nanobioscience, A.R.I., for her kindness and infinite help in every step of the way. There are three aspects of her personality apart from her exceptional dexterity & data interpretation ability as a scientist that I wish I can learn...her calmness, her remarkable capacity to help one and all…and finally, her incredible ability to get along with everyone!!!
I thank Dr. V. Ghormade, Scientist, Centre for Nanobioscience, A.R.I., for her warmth, support and unconditional acceptance. It gives me immense pleasure to thank Dr. Varsha Singh, Dr. Bipinraj NK, Dr. Santosh G. Tupe, Mrs. Rinku Umran and Ms. Kavita R. Bhayani for not only being my “friends” in every sense of the word, but also for training and helping me in acquiring scientific, experimental, instrumentation handling and data formatting skills without which it would have been impossible to complete the objectives of this thesis.

I wish to thank Dr. Jaya Jain and Dr. Sumit Arora for initiating and investigating on several aspects of silver nanoparticles related study. It was on the foundation of their research that I was able to build my work.

“Financial resource is the indispensible fuel for any research”; I wish to thank Nano Cutting Edge Technology Pvt. Ltd., Mumbai, for funding this work.

I thank the doctors and staff of Surya hospital, Sahyadri hospital and Jehangir nursing home, Pune, for providing the clinical isolates which made this research possible.

“There is nothing better than encouragement from good friends” I would like to thank all my earlier and present lab mates at the Centre for Nanobioscience, my colleagues from other departments of A.R.I. who made my years in the laboratory pleasurable and the entire tenure a very enriching experience.

I am thankful to Shailesh Waghmare, Laboratory assistant, Centre for Nanobioscience, administrative staff and library staff of A.R.I. for their cooperation.

I would like to thank all my professors, teachers and trustees of Lila Poonawalla Foundation, Pune, for the efforts they took and continue to take for my progress. It is because of them that I believe “I am only one, but I am one. I cannot do everything, but I can do something…and I will not let what I cannot do interfere with what I can do.

“The love of almighty, one’s family and friends is life’s greatest blessing”…I am thankful to “divine interventions” which have led me to believe that “whatever happens, happens for the best!!” I am grateful to and for my father, my brother, my entire family and friends. It is their constant support; unconditional infinite love and belief in my capabilities which has made me achieve my goals.
