List of Tables.

1. Interaction between Treatment and Trial for Abdominal Strength ........................................... 109
2. Mean Achieved on Abdominal Strength .......................................................... 111
3. Trend analysis of Trials for Abdominal Strength ........................................... 112
4. Summary of Trend Analysis for Abdominal Strength ........................................... 112
5. Interaction between Treatment and Trial for Leg Endurance ........................................... 114
6. Mean Achieved on Leg Endurance .......................................................... 115
7. Trend analysis of Trials for Leg Endurance ........................................... 116
8. Summary of Trend Analysis for Leg Endurance ........................................... 116
9. Interaction between Treatment and Trial for Agility and Co-ordination ........................................... 118
10. Mean Achieved on Agility and Co-ordination .................................................. 119
11. Trend analysis of Trials for Agility and Co-ordination ........................................... 120
12. Summary of Trend Analysis for Agility and Co-ordination ........................................... 120
13. Interaction between Treatment and Trial for Agility ........................................... 122
14. Mean Achieved on Agility .......................................................... 123
15. Trend analysis of Trials for Agility .......................................................... 124
16. Summary of Trend Analysis for Agility .......................................................... 124
17. Interaction between Treatment and Trial for Reaction Time ........................................... 126
18. Mean Achieved on Reaction Time .......................................................... 127
19. Trend Analysis of Trials for Reaction Time ........................................... 128
20. Summary of Trend Analysis for Reaction Time ........................................... 128
21. Interaction between Treatment and Trial for Ruining Speed ........................................... 130
22. Mean Achieved on Ruining Speed .......................................................... 131
23. Trend analysis of Trials for Ruining Speed ........................................... 132
24. Summary of Trend Analysis for Ruining Speed ........................................... 132
25. Interaction between Treatment and Trial
   for Arm Strength .............................................. 134
26. Mean Achieved on Arm Strength ............................. 135
27. Trend Analysis of Trials for Arm Strength (Explosive). 136
28. Summary of Trend Analysis for Arm Strength ............. 136
29. Interaction between Treatment and Trial
   for Cardio-Vascular Endurance .............................. 138
30. Mean of Cardio-Vascular Endurance ......................... 139
31. Trend analysis of Trials
   for Cardio-Vascular Endurance ............................. 140
32. Summary of Trend Analysis
   for Cardio-Vascular Endurance ............................. 140
33. Interaction between Treatment and Trial
   for Leg Strength .............................................. 142
34. Mean Achieved on Leg Strength ............................. 143
35. Trend analysis of Trials for Leg Strength ................... 144
36. Summary of Trend Analysis for Leg Strength ............... 144
37. Interaction between Treatment and Trial
   for Kho-Kho Performance ..................................... 146
38. Mean Achieved on Kho-Kho Performance ..................... 147
40. Summary of Trend Analysis
    for Kho-Kho Performance .................................... 148
